

Suburbs By The Truckload

Suburbs are spreading farther out into the wide open spaces as our population continues to grow by leaps and bounds—and truck transportation makes this giant expansion program possible. That's because trucks are the only transportation system flexible enough to service all the out-of-the-way places people are moving to these days. . . . Trucks go wherever there are roads—so homes (and factories and business establishments, too) can be located just about anywhere and everywhere in this big country. . . . No matter where you live or do business, trucks assure you fast, efficient service for all your transportation needs.

'Have Safe and Sane Christmas'—Fire Dept.

Birmingham Fire Department Chief P. H. Smith, and Fire Marshal George Scott urge all Birmingham residents to be extra cautious with their Christmas decorations this year. In their release for this Yuletide season, they list the items most likely to start a fire or cause an accident.

"Something new has been added—the all aluminum Christmas tree. As advertised, this tree is fireproof, but there is an added hazard which the evergreen trees do not have.

Their warning was backed by the Detroit Edison Co. last week. At the request of the Detroit Department of Building and Safety, ran a series of tests which showed that the metal fronds can penetrate wire insulation and charge the whole tree.

"When placing tinsel on the branches, it is important that none of the tinsel be placed in a position where it is possible to come in contact with the inside of the light socket.

"The evergreen tree, being full of pitch, is a potential torch and certain safeguards should be taken if we are to be assured of a fire safe Christmas.

"There is no way possible to make an evergreen Christmas tree fireproof because of the inability to remove the pitch from these trees, however, we can prolong the time in which the tree will ignite readily.

"TO DO THIS, keep the tree out of doors until such time that you are ready to set it up and decorate. Before the tree is set up, the trunk of the tree should be freshly cut off at least one inch above the original cut and placed in a tree standard or holder which contains water.

"After the tree is set up, depending on the size, it will drink a quart or so of water every day.

"When the needles start to fall from the tree, the tree is at this point highly flammable and should be removed to the outdoors.

"THERE IS ALWAYS the possibility of fire caused by the careless smoker. Too often we read in the newspapers where Santa Claus died from suffocation and burns when he lighted a cigarette. Santa, who ever, add his uniform, along with any other flimsy light material used for decorations should be flameproofed.

"This can be done very inexpensively. The ingredients for making a flame-proofing solution can be

fireplaces. The fireplace is not designed to burn this large volume and the flames will shoot out into the room.
