THIS IS WHAT WE SAW!

charming arrangement of lawn, shrub 2. A lawn burned with a so-called non-burning fertilizer.

3. Red Spiders growing redder and fatter and hungrier on the sweet delphinium/sap. 4. Avid aphids doing their best to multiply and destroy.

destroy.

5. Rose chafers (beetles) eating the hides off the peonies and iris and devouring the flowers in record time. They appeared on other plants they ain't supposed to be on.

record time. Incy appearant's supposed to be on.

6. Rows of healthy looking broadleaved shrubs with their leaves coated with a glossy, sticky

coating.

7. Scales of Three kinds — but especially the LECANIUM (soft brown) scale — on elm trees, birch trees, mock orange, flowering crab, flowering plum, redbud and many other shrubs, yews, arbor vitae, etc.

8. Two adjoining yards in which no reasonable controls are used due to lack of knowledge, lack of interest, lack of time, lack of money or two or more or all.

or more or an.

We resolved right then and there to point up
this visit, and without becoming too technical, tell
you what to do. The following suggestions are
numbered in accordance with the foregoing
"sights."

numbered in accordance with the foregoing sights."

1. Enjoy it.

2. Do not be deceived by the term "non-burning" lawn fertilizer. A combination of drought followed by warm moist weather can provide an enormous sudden release of nitrogen from even a 100% organic fertilizer and burn the lawn 2 or 3 weeks AFTER application.

PROCEDURE:—If you use 2 or more pounds to 100 sq. ft. of a fertilizer with 8 to 10% of nitrogen per 100 lbs., WATER IT IN!!

3. Deny them this privilege by spraying the plants at intervals of one week with a combination of Malathion, Lindane and DDD. The trade names are BONIDE LAWN & GARDEN INSECT SPRAY and ORTHO'S ISONED SPECIAL CONTROL OF SPRAY and ORTHO'S ISONED SPECIAL NOTES are the burntless of the spraying produces better coverage and greater effectiveness and lasting quality than dusting. Don't do a half-baked job. WET the plant from stem to stern and top to bottom. Don't be embarrassed. Sock it to 'em.

1. Same as No. 3. (We saved expensive space here).

4. Same as No. 3. (We saved expensive space here).

5. These seasts arise from sod areas—not from cultivated garden areas. Two primary control of the control of control.

If you do your own spraying on the shorter

He can spray once between June 15th and June 30th and produce a tremendous amount of control.

If you do your own spraying on the shorter trees and shrubs, you should spray every week for 3 or 4 weeks because the material YOU will use (No. 3) does not have as long a residual effect and because you cannot (?) be as efficient assprayer, At the same time this No. 3 material (it must sound by now that it or ignates in a Redstone or Regular mission to the state of the state

sprayer or aerator, wny can you get together on the mutual problem of BUGS?

If the professional sprayer can spray 2, 3, 4, 5 6
or 7 backyards at the same time, it will cost you progressively less and your personal enjoyment of your yard will be progressively INCREASEDI Get together with your neighbors!

Note—This mutual is the most chopmare "probably" when the progressive is not together with your neighbors!

Note—This mutual is the most thoughtful and serious effort we have made in these columns for some time. It is our desire to hely you attain the most enjoyment from your yard and garden with the life the most satisfactory results have cost the owners less money and effort than is the case of the owners of medicare to poor results—simply because of their willinguas to practice. We still have some edities who use SHEEP MANURE for fertilizing their lawns because their grandfathers had good lawns by inviting their sheep in to mow and forther will produce their willings and their lawns because their grandfathers had good lawns by inviting their sheep in to mow and forther in the produce of their willings and their lawns because their grandfathers had good lawns by inviting their sheep in to mow and forther will produce their willings and their lawns because their grandfathers had good lawns by inviting their sheep in to mow and forther their sheep in to mow and forther their sheep in the most and the statement of their willings and their sheep in the most and their sheep in their lawns and their sheep in the most and
