Hodges Starts Big May Roundup Sale

Looking for a car? Then "See the man in the white hat."
This slogan is being used by Hodges Inc., 360 S. Woodward, for

its May Roundup Sale of Valuses in both new and used cars.
BIRMINGHAM office manager Vern Doonan says this is the biggest sale ever conducted by the Hodges organization and the company has joined the western craze by adding the western touch.
A stagecoach has been hired by the company to help promote the sale and will make one round trip a day between the Birmingham office and the branches in Ferndale. Salesmen and mechanics will all be wearing white hats that will serve as a trademark of the sale.

THAT STAGECOACH is complete with driver and shotgun rider and will take two hours to complete one leg of the trip down Woodward.
The Birmingham office will be selling Dodge, Chrysler and Renault products while the Ferndale office at 23000 Woodward handles Plymouth and Dodge.
The salesroom at 23100 Woodward sells Renault and Peugeot.

Birmingham Mayor Harry Denyes (framed in the doorway) prepares to enter the Hodge Stagecoach for the first ride as Hodges Inc. marks the first day of its May sale. With the mayor are Earl Orr (center) vice-president of Hodges and Vern Doonan,

manager of the Birmingham branch office, 360 S. Woodward. Called the May Roundup Sale of Value, all three offices of Hodges will have the western touch. The stagecoach will make a round trip a day between the Birmingham and Ferndale branches.

WHAT DOCTORS SAY ABOUT

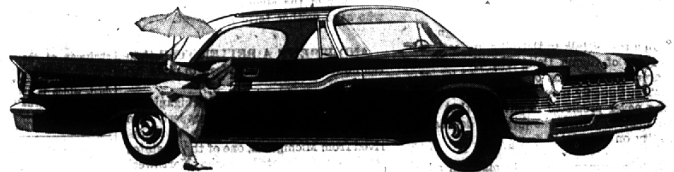

• Pony Tail Baldness • Adhesions
Note to readers: Thanks for all the nice letters. As many questions as possible will be answered. In this column, but for obvious reasons replies must be brief.
Q. "I am 14 and have developed a bald spot on my neck. The spot is quite noticeable when I fix my hair in a pony tail. What could cause this baldness?"—Mary.
A. Your pony tail may be responsible. Persistent and prolonged traction (pull) on scalp hair can produce baldness. Skin doctors often notice this patchy loss of hair in girls who wear pony tails. Try a different hair style and see if this won't help.
Q. "We often hear that science is trying to find a cure for arthritis, cancer, etc. Do scientists ever work on trying to find a cure for adhesions? I have suffered from adhesions for 17 years."—A Canadian reader.
A. Much experimental work has been done in trying to find an answer to this problem. A substance discovered several years ago showed promise in "dissolving" adhesions in laboratory animals but its use in humans is possible.
another matter. It can be used in some cases but not in others. Although surgeons are better able to prevent adhesions now than they were in former years, the problem of what to do when they form still looms large. Some people tend to develop adhesions to a greater extent than others. Surgery to loosen the parts that have grown together is considered when there is some interference with organ function. This often helps but the tissue may grow together again, forming more adhesions.
