

History-Marking Event

District One chairman, Judge Fletcher Renton, (left) discusses with Council Vice-President Paul Wilson, 962 Puritan, Birmingham, plans for construction of a commemorative tribute to be built in connection with Scouting's 50th Birthday Anniversary celebration. Already approved by Congress and President Eisenhower, the commemorative tribute to be built in Washington, D. C. will be a perpetual recognition to some 8 million men and women volunteer leaders during the first half century of the movement's existence.

Paving Projects: 2 Done, 3 to Go

Of the five paving projects being done this fall, two have just been completed and one is almost finished, Birmingham City Manager reported Monday.

The Frank-Purdy paving and W. Maple sectional replacement were done this week, Gare said.

Lincoln between Southfield and Pierce has been paved and widened, and asphalt work should have begun yesterday, Gare said.

PAVEMENT FOR the widening lanes on Eton, from Yosemite to Lincoln, have been installed. An asphalt resurfacing over the old center lanes is expected to go down shortly, the manager said.

Preparations have begun on Lakeside's resurfacing from Midland to the Rouge bridge.

Finds Lawn Mower Costs High—Tho It's Late in Season

Richard R. Bryce, 29, of 751 Davis, Birmingham, pleaded guilty to the theft of a lawn mower in Berkeley municipal court last week.

Justice Ralph F. Finley, sitting in for Birmingham municipal judge John C. Emery, in New York city on business, and substitute Edward Emery, also out of town, sentenced Bryce to 30 days in the Oakland county jail and placed him on probation.

ORIS ALLISON, 46, of 374 Oakland, Pontiac, was found guilty of driving under the influence of liquor, by Judge Emery, Monday.

He was fined \$100 or 10 days in the Oakland county jail plus \$3 court costs. Allison paid the fine.

Steven J. Radom, 18, of 981 Arlington, was fined \$20 plus \$3 court costs, for speeding and violating a stop sign.

Dorr F. Lovett, 42, of 1189 Stanley, was found not guilty of a charge of violating a stop sign.

Seaholm High Parking Problem

Residents on Wellesley Drive, Birmingham, have been complaining about the number of cars parked on their street and on Midvale by students of Seaholm high school, Birmingham. While the school parking lot (above) has several empty spaces, students' cars jam Midvale (below) and there were nine cars on Wellesley.

Seaholm Principal Ross Wagner said that all students requesting parking permits have been given them, but that the students are not using the lot. Residents are petitioning the Birmingham city commission for no-parking signs to be installed on the side streets.

Home from Europe

A dressmaker, Mrs. Stella Gruich of Henrietta street, Birmingham, returned recently from Europe, where she visited her mother in Belgrade. Before her return home, Mrs. Gruich stopped off in Rome, Zurich, Genoa, Paris and London. Mrs. Gruich received her citizenship papers July 1.

'S Great for Skiers, But 'Sno Good on Road

Six quick tips from the National Safety council on how to be a better winter driver:

1) Winterize not only your car, but your driving technique and your attitude, as well. Normal speeds often are too fast for winter conditions. When weather's bad, slow down.

2) HAVE GOOD tires—preferably snow tires—and for more severe conditions, use reinforced chains.

3) Keep windshield and windows clear, and wiper blades, heater and defroster in proper operating condition.

4) Get the feel of the road as soon as you start out (but away from hazards or other cars). By cautiously trying your brakes or gently pressing your accelerator, you can learn how slippery the road surface is. Then adjust your speed accordingly.

5) KEEP WELL back of the vehicle ahead to give yourself plenty of room for an emergency stop. Following too closely is doubly dangerous on winter roads.

6) Pump your brakes to stop quickly on icy roads. Jamming on the brakes will throw the car into an uncontrollable skid. The trick is to slow the car by rapid and intermittent brake applications, and at the same time maintain rolling traction that gives steering control.

"There's nothing much you can do about winter weather—except be prepared for it," the National Safety council said. "Snow and ice, combined with early darkness, frequent snowstorms and splattered windshields, help cause the high auto death and injury toll in the winter."

THE COUNCIL cited these revealing facts:

1) In one out of six fatal auto accidents, the weather is rainy, foggy or snowy.

2) In one out of four fatal auto accidents, the road is wet, snowy, icy or muddy.

3) In fatal auto accidents in which the driver's vision is obstructed, rain, snow and sleet on the car windshield crop up in two out of five instances.

"Seat belts, a must whenever you

drive," the council said, "are especially valuable in winter.

"But nothing," it emphasized, "protects a driver as much as being prepared for the added hazards of winter driving."

Italian ski divers have discovered a vast deposit of ancient Roman jars 60 feet under water off Sardinia.

The first printing press in the New World was set up in Mexico. Craftsmen in Mexico City were printing books in 1539, less than 100 years after the press was invented.

Should City Fight to Save \$250,000 Aid?

Should Birmingham line itself up against possibly 11 other South Oakland cities in an effort to save \$250,000 in federal aid?

Not without first surveying the depth of other communities' fighting spirit, Birmingham commissioners believe is the better part of valor.

THEY ASKED City Manager L. R. Gare to see just how determined the other cities are about losing the \$250,000 contribution on the proposed Dequindre interceptor sewer in order to bring Madison Heights to terms on the proposed 12 towns drain.

All need both sewers, but Madison Heights is balking its 12-towns assessment and gone to court. So other members have said they will insist both projects proceed at the same time.

Birmingham, being at the upper end of the sewer system, is in no rush for completion. However, its commission doesn't like to see \$250,000 given up without considerable deliberation.

Natural GAS YOUR SILENT SERVANT

"Lung" Checkups Keep Gas Meters Accurate

Your gas meter is similar to a healthy lung. It actually goes through the motions of breathing—inhaling and exhaling gas by means of little diaphragms of leather or plastic. At each intake of "breath," the meter registers how much gas is consumed.

The "lung" and other vital parts of your gas meter are regularly inspected to insure accurate measurement of gas consumption. More than 300 gas meters a day go through the scientific test and repair cycle at Consumers' General Meter Building in Jackson.

Here gas meters are tested, adjusted and repainted. Even new meters, fresh from the manufacturer, must undergo rigid tests before going into service. Only a meter of demonstrated accuracy is permitted to measure the gas that serves you.

Only GAS does so much, so well... the modern fuel for automatic cooking... refrigeration... water-heating... house-heating... air conditioning... clothes-drying... incineration.
