Yes sir! When it came time for me to install a new furnace last year I had a heck of a time trying to make up my mind what type to install. After a lot of checking, I finally decided on oil—and that's the smartest thing I ever did.
 Do you know—I discovered that you can heat your home more economically with oil than with any other type of fuel. As a matter

of fact—oil is the safest and cleanest method of home heating yet devised. That's mighty important, and something many people don't know. Yes sir, Jim, if I were you I'd look very carefully into the matter, and I'd check with a member of the Oakland Oil Heat Council for some good, sound advice, too.
