Freedom Award Winner Addresses Rotary Club

An Irishman who sells America to Americans—a "salesman" whose only products are freedom and flowers—visited Birmingham Monday. Dr. Ian Stuart, noted author and lecturer and community relations director for Florists' Telegraph Delivery association addressed the Birmingham Rotary club at its noon meeting.

John Moss of John Moss Florist at 243 W. Maple Avenue, arranged for Dr. Stuart's appearance, and introduced the speaker.

ALTHOUGH HE is sponsored by 11,000 FTD florists across the nation, Stuart spoke on a different subject. His message was on America and the safeguarding of our American way of life—a talk with some bits of humor, words of wisdom about world affairs, and some philosophical advice on how to be a better leader of tomorrow. He has inspired countless business and civic groups, and for his multitude of outstanding addresses and community service he received the national Freedom Leadership Award this year from the Freedom Foundation of Valley Forge.

This was the first time a professional speaker or a spokesman for a trade association was so honored by the nationally recognized agency devoted to promoting a better understanding of the American way of life.

Traveling more than 150,000 miles a year across the nation, Stuart probably makes more speeches than any other person in America, but he has never written one and just got up and talk about what he believes in, he said. "Nothing is duller than hearing someone read a prepared speech."

DR. IAN STUART joining Florists' Telegraph delivery, he was director of guidance at Mercersburg Academy, Pa., and later educational director for the Southern States Industrial council.

An author as well as a lecturer, his books include the Simplified Shakespeare series, "Thoughts for John," and "Matriculation British History."

STUART is a favorite of high school students, and is often tagged "The Flying Schoolmaster." Over a four-year period, he has spoken to more than a half million students. More recently, members of the press and radio have dubbed him "Mr. Mercury" because of his affiliation with FTD and the association's Mercury emblem.

Dr. Stuart is in the Detroit area to help celebrate FTD's golden anniversary and to attend a writer organization holds its 50th convention at Cobo Hall in Detroit.

Most Lawns Need A Good Deed Now!

Mom has decided to have a better lawn. Timmy, like any good scout, helps. First, he applies TURF BUILDER? It steady-feeds without burning. Next, it's mom's turn. She's chosen CLASSIC? seed because it's all-perennial, weed-free, and makes a showplace lawn. And it goes on the same way—a pleasant half hour stroll with the Scotts Spreader. Hmmm. Bet dad takes all the credit.

The new Scotts Lawn Program Guide tells you how to get a better lawn this very fall. It's free. Ask us for it!

Save 5.00! Scotts Spreader (16.95) plus Scotts Seed (6.95), both only 17.90

REPORT

Results from users of ZYTRON and RID (PRE-EMERGENCE CRABGRASS CONTROLS) last spring are exciting to say the least. In all instances so far reported NO PLANTS were found in the treated areas. Other materials gave inferior control with a few exceptions.

WHAT TO DO TO crabgrass plants you may have to contend with. Three universities report that SUPER A TO X and CRABGROSS CRABGRASS KILLER are the most effective post-emergence liquid controls. VAUGHAN'S H.O. is an outstanding material for spreader application. All of these materials may require 2 applications at least.

MADONNAS are reported at 850 S. Woodward Ave. in great numbers. It is said they are the famous CHATEAU DE NARCE strain from Northern France. The pure white flowers will appear on 2' to 5' stems in late June and July. They should be planted as soon as possible and covered with only 2" of soil. Rumor has it that they can be purchased for 45c each or \$4.75 a dozen.

NEW HERBICIDES are reported to control various kinds of objectionable plants in lawns and driveways. Good timing is important.

- Driveway nuisances can be slain at any time with HAMMOND'S WEED KILLER.
- Chickweed, knotweed, clover, etc., are knocked out with 7 & H CLOVERKILDER ORTHO CHICKWEED & CLOVER KILLER VAUGHAN'S CHICKWEED KILLER DUPONT CHICKWEED KILLER This is the time—NOW.
- Broadleaved weeds are most efficiently knocked out about Sept. 15th with: DUPONT WEED KILLER MCB'S LAWN WEED KILLER ORTHO WEED-B-GON WEEDONE

LAWN MAINTENANCE people say (if they know anything) that a good program of lawn refurbishing for fall will require:—

- Killing chickweed, clover, etc. NOW
- Fertilize a week later for the 3rd time using 2 lbs. of actual nitrogen per 1000 sq. ft. (4th time for Merion).
- Scratch out dead stuff from spots, seed, cover with PEAT MOSS, water.
- Kill broadleaved weeds a week later.

NEW YORK reports a vast and fascinating array of Christmas materials on display. So-long! Back on the 31st! Move gossip indicates that 850 S. Woodward will look like New York again this fall with dried materials, made-up unusual decorations, gifts, coffee, demonstration lectures on several Saturdays, and those famous snickerdoodle cookies.

Please plead for us as we hunt for the spangles in the hot, humid, wholesale area.

CORN BORERS and CORN EARWORMS announce a relentless attack on corn and that "the only way you can beat us is to:

- Spray us borers with 3 tablespoons of DD-DDE to a gallon of water every week until a week before harvest.
- Spray us earworms 2 or 3 times about 3 days apart as soon as the silk shows, using 2 1/2 cup of light mineral oil to a gallon of water." (How self confident can they get?)

TORO boasts a deal for fall that will worry you until you take advantage of it. With the purchase of a ROTARY MOWER you get \$19.95 worth of leaf bagging and toting equipment FREE.

In the cloak rooms they are saying that you don't need the free stuff to get a bargain—you already have a bargain when you BUY a TORO.

ROOTS state that they will need mulch and watering to stay alive these next 3 or 4 weeks.

PLANTS in general notified the public not to put away their insecticides and fungicides yet. "We will need them regularly," they say.

GLADIOLAS—Give us water and DDT.

MUMS—Feed us, water us, take out our weak stems. "F. Doolittle"
