## CFM Director Guest Speaker

"We must concentrate our attention on the pressing State problems," said guest-speaker Ralph W. Conant, executive director of Citizens For Michigan in his address to the Birmingham CFM chapter last week.

A large turnout heard the director emphasize the importance of the study groups in each chapter and the need for the groups to narrow their field of study.

David F. Brock, president of the Birmingham chapter stressed the importance of active participation by members in the local study groups. He also encouraged newcomers to join the study groups.

The following were elected as officers of the three study groups: Paul Wheaton, 1783 Midvale; William Cochran, 19180 Riverside Drive; and Harvey Pierson, 1786 Graefield road.

The leaders then reported on the progress of each of the groups, which include studies on welfare, state income tax, increased sales tax, a constitutional convention and the changing of political districts.

Further study group meetings on services and structure of government will be held Wednesday, Feb. 17 at 8 p.m. at the Birmingham Community House.

A clinical study group will meet Monday, Feb. 22, at 8 p.m. in the office of the Birmingham CFM Chapter. The meetings are open to the public.

## This Is Our Michigan

## More to Our Industry Than Meets the Eye

By WILLARD BAIRD  
 Sixth in a Series

Michigan is blessed with a fabulous supply of salt . . . estimated by one geologist at 71 trillion tons!

We are, of course, the number one producer of salt in the United States, and geologists say we have at least 29 percent of the nation's total salt deposit.

ONE OF OUR salt companies digs rock salt from an underground bed. Four other recover salt by evaporation from natural and artificial brines pumped from subterranean wells.

We produce table salt and rock salt and a variety of 100 chemical salts which place us among the nation's top producers of pharmaceutical products—and the country's foremost source of aspirin.

Out only underground salt mine is 1,137 feet below the southwestern section of Detroit. Owned and operated by the International Salt Company, its 60 miles of tunnels could hold the entire population of Detroit.

As one of the nation's major producers of cement, we have nine huge plants engaged in the manufacture of that product . . . at Alpena, Wayne, Bay, Emmet, Leelanau, St. Clair and Monroe counties.

Michigan has the world's largest limestone quarry, at Rogers City which calls itself "the limestone capital of the world" . . . the world's largest Portland cement plant at Alpena . . . and the largest gypsum quarry at Alabaster.
