

## THE REMARKABLE DKW... STARTS IN 60 SECONDS AT 60° BELOW ZERO

Tough factory tests prove that the DKW's unique two-stroke cycle engine will start in 60 seconds at 60 degrees below zero. Why? Simple! Lubrication is by oily vapor. No oil to gum up the cylinders in icy weather. Only three cylinders and seven basic moving engine parts, too. Cuts gas bills, cuts maintenance and repair costs. Handles with incredible sure-footedness on ice, snow, mud or sand, where other cars stick or slide. It's a comfortable, spacious, handsome car, built to exceptionally high standards of quality. See us now and drive the delightful DKW.
