**B of E Candidate Advocates Efficiency in School Design**

BLOOMFIELD HILLS—George A. Jones, candidate for the Bloomfield Hills school district board of education in the coming June 13 election, is completing an assembly of a brochure from architectural sources as well as educational research groups on flexibility in school room layout.

**JONES POINTS** out that until recently class rooms have been fixed in size and character in the original building plans by permanent wall construction. New components, such as folding walls that operate electrically and hydraulically at the push of a button and that seal at floor, ceiling and both walls and are practically as rigid and sound proof as a permanent wall offer new latitude in school planning.

**BECAUSE THE** Bloomfield Hills school population is expected to double in the next ten years, it is his contention that every opportunity should be explored to avoid commitments in fixing room size and over-construction to fit an ultimate requirement that may be years in materializing.

across a world get together, ideas sometimes jell. That's what happened when Mohindra's search for products the Kenya natives could make for Americans. Why don't you African craftsmen carve a good-looking door-stop, perhaps a dog with a bone that slips underneath and holds the door? said career woman Amy Morse. "That's a good idea," said Mohindra. "Just the kind of thing we're looking for!"

Although she has visited New York many times Mrs. Harold Christian of South Millway considers her recent visit the most thrilling of all. This time she showed the city to her nine-year-old grandson, Robert.

Robert's biggest thrill was the Empire State building where he went up 102 stories and saw New York from every angle. Dining that night at Top of the Sixes on the 60th floor he remarked, "What only 33 floors?" Another highlight for Robert was a tour of the Queen Mary just before she sailed.
