QUESTION OF THE WEEK: Can you give me some information as to best soil and fertilizer for dahlias?

BOB'S ANSWER: Dahlias do better in a loose, sandy, well drained soil. Since they are naturally very leafy plants the best fertilizer, to insure good blooms, should have a high content of phosphorus and potash. More specific information will be given on request.

why there's no kitchen like an **ELECTRIC KITCHEN**

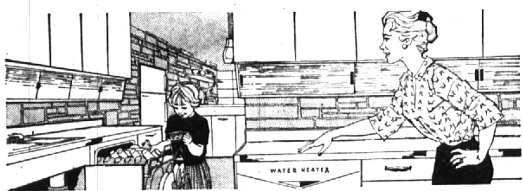

**ELECTRIC COOKING IS CLEAN, COOL, QUICK.** All the heat goes into the food from direct-contact electric elements, none escapes into the air. Super-speed units bring liquids to a boil in seconds. You never see

blackened pans in an electric kitchen for electric cooking is white-glove clean. Choose from built-in counter top units and ovens or from many styles of free-standing electric ranges.

**ELECTRIC REFRIGERATOR-FREEZERS HAVE BIG CAPACITY.** Two wonderful appliances in one! Refrigerator and freezer. The freezer compartment is big enough to hold worthwhile quantities of food. Buy foods at seasonally low prices and safely store them. Save time by preparing foods ahead—make three pies and freeze two. New frost free refrigerator-freezers eliminate defrosting entirely.

**COUNTER TOPS DO DOUBLE DUTY** with an electric appliance center. Pullout extension cords and extra outlets, all on one central panel, give you Housepower at your fingertips. Simultaneous operation of many counter top appliances—waffle, iron, fry pan and coffee maker, for example—is possible without blowing fuses. Automatic timing is another feature. All together, it's just like having extra range capacity.

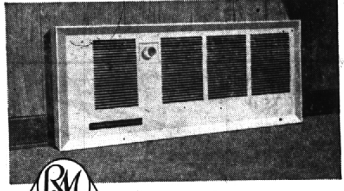

**DOING THE DISHES WAS NEVER SO EASY.** The process is simple—loss food scraps into the disposer. They just grind up and wash away, never have to be handled or wrapped. Then slip dishes, glasses, flatware, pots and pans into the dishwasher. Everything comes out sparkling, and much cleaner than you can wash them because most dishwashers use hotter water than your hands can stand.

**PLENTY OF HOT WATER** where and when you need it. What better place for a water heater than in the kitchen where you use hot water? A tabletop in a hard-to-use corner of the kitchen cabinets. This is the water heater without flame or fumes, so you put it where it's most convenient. The 50-gallon size supplies normal hot water needs of 4 out of 5 families.
