

Everyone loves an individual!

Do we ever ask ourselves whether the same thing that is "appropriate and beautiful" for The Joneses is also appropriate and beautiful for ourselves? Is this repetitiousness a necessary result of contemporary living, which forces all of us into standard attitudes so that a standard interior is the only one suitable to our lives? We hope not! Furnishing a home is unique in that it still allows us personal expression. At Daly Brothers our interior decorating staff are qualified professionals to create original and refreshing interiors . . . tasteful in terms of design, function and ideas that best express your own individual thoughts. In the end, it all depends on the individual. The best taste is a harmony between you and the way you live, and if your home never gets into the magazine as a model, that's all right. It is still yours! Come soon for a fresh look at living. See ideas 1960 that could adapt perfectly, whether you're refurbishing a new home or adding that something extra to give your room a new focal point. Start with quality right from the beginning at Daly Brothers. Intelligent decorating assistance costs no more . . . and gives lasting satisfaction. Convenient terms, of course.
