What Grows Goes By Truck!

Like Michigan's factories, offices, shops and homes, her important farming industry depends on motor transport. Trucks play a vital part in getting crops planted, cared for, and harvested—and they are the means by which the harvest gets to market. For example, nearly 90% of fruits and vegetables moving into Detroit come directly by truck. And this is relatively true of other cities throughout Michigan... In addition, virtually all farm products travel by truck at least part of the way to market. So you see how very much the dynamic farming industry relies on the trucking industry in this great State of ours.
