Illinois 'U' Rejects Illiteracy

The University of Illinois, with 23,000 students and 6,600 professors, has decided that it will admit no more high school graduates who can't read, write and spell

In explanation, we have to go back 27 years to 1933. At that time our high schools were turning out therearly fruit of the "modern" educators, such as Dewey, Kilpatrick, Rugg and various other "fron-tier thinkers."

The education (?) and mental apparatus of their high school kids generally was so poor, that the Illinois University set up a special course in remedial English so that these freshmen might understand the words, at least, spoken by the professors and found in college textbooks.

THE UNIVERSITY, BEING a State tution, felt that it had to do what

the high schools had failed to do. The Unithe high schools had failed to do. In echipersity believed that a college student should be able to read, spell and compose a clear sentence in the English language. But yearly the situation got worse and the number of ignorant freshmen got

larger and larger. And even one in five flunked this course!

Now the University has thrown up its hands, turned the job back to the high schools, where it belongs, and will now admit no freshman who can't read, write

Only work, discipline and sound methods can cure this mess. Otherwise, the billions of additional dollars the present "frontier thinkers" plan to give our teachers and administrators will fail to educate youth so that our freedom stands a chance to

Pirates Still Roam The High Seas

Yes Sir, there yet remains within this Yes Sir, there yet remains within this ole human society something of the bold spirit of Bluebeard, Blackbeard, Capt. Kidd, Henry Morgan, Jean LaFitte and other famed buccaneers—those adventurous pirates who plied the Spanish and other "Mains."

other "Mains."

For future Eccentric writers of "Happenings of Long Ago", let us record the fact that a Portuguese revolutionary leadfact that a Fortuguese revolutionary each er, Henrique Galvao, aided by 80 fellow-rebels against Portugal's dictator Salazar, seized the 20,000 ton passenger ship Santa Maria, controlled her for two weeks before allowing her 620 passengers to disembark

Galvao and his "crew" boarded the ship

in Venezuela as passengers, then "took over" after a short "battle", with one dead and a number injured. It was one of the strangest sea dramas in many decades.

EXACTLY HOW Galvao expected seiz-EXACILIT MOV davian expected seriors the ship would help to overthrow Sala-zar back in Portugal was never revealed. Galvao was forced to bring the Santa Maria into Recife, Brazil, where Brazilian officers in turn took charge, planning to return the ship to its owners.

Galvao and his rebels were given protec tive asylum by Brazil. But those original passengers, 42 of whom were Americans, will have some tall stories to tell their great grandchildren. Pirates—oh, Boy!

Castro May Burn His Whiskers

The Castro regime in Cuba is still talking and acting defiantly. It still enjoys great popular support. But it has been hurt, and will increasingly be hurt, by the frontal attack which the Roman Catholic church has launched. It also has been thurt by the Organization of American States' decision to consider subversion within the Western Hemisphere despite

within the Western Hemisphere despective Cuban opposition to such action. The initial phase of the church attack was a pastoral letter in which the bishops of Cuba denounced the revolutionary government in massingly close ties with ernment's increasingly close ties with Communism. The timing of this onslaught suggests a belief that the regime is losing strength among the people. The bishops seek to hasten the process.

IN THIS THEY MAY SUCCEED, particularly if the regime comes to be in open conflict with the church. There are some indications that the government may make such a mistake. Even if the threat to deport Spanish-born priests and set up a Cuban national church is not carried out, deep trouble may arise from Castro fol-lowers' demonstrations against church-goers. Though Latin Americans are not notably devout in their daily lives, the church has a powerful hold on their minds and hearts. The regime would flaunt this at its peril.

Support among intellectuals, and to a Support among interestings, and to a lesser extent among the masses, may be further weakened by the O.A.S. unanimity (excepting Cuba) in demanding that sub-(excepting Cuba) in demanding that swersion and "present international tensions in the Caribbean" be probed. This demand will provide food for sober second thought about the "glories" of the revolution. Coupled with the church's attack, it constitutes a hard punch to the

ing from a fire started in an over-stuffed sofa or chair, caused by a burning cigaret. Now that filters have reached maturity, maybe the manufacturers of the little white cigars will fashion cigarets so that,

unless puffed almost without interruption,

Said a current humorist: "Too many

Americans are going in for weight-lifting with the wrong equipment—a knife and fork."

Adlai Stevenson faces one of his great-est eras of self-discipline as our United Nations ambassador. Here is a man who is wealthy, has been Governor of Illinois,

is wealthy, has been Governor of linnois, twice was the Democratic candidate for President; he is expected to be the voice of a youthful U.S. President, even though he, Adlai, for years has been able to reveal his own attitudes on domestic and world affairs without interference from

world anairs without interference from others. If he can make his utterances sub-servient to Kennedy's he will have per-formed a remarkable assignment of self-

discipline. But will he?

From The Eccentric's Point of View... Often you read about some person dy-

We join others in the belief that the We join others in the belief that the Communist threat to our freedom is great-er than we have appraised it. We trust that the Kennedy administration will en-lighten not only the U.S.A., but all free-dom-loving nations on this world danger.

In his first press conference, new and young Secretary of Defense Robert S. Mc-Namara told the press corps that it would last only 30 minutes—no more. And that's what did happen, even though all the queswhat do nappen, even though air the ques-tions on reporters' lips were not answered. McNamara probably will find it more con-venient to be not so abrupt. He will find that heading a public, tax-supported gov-ernmental agency is quite different from heading up a large private industry. Many others here.

The Duke of Windsor, Britain's former King Edward VIII, who abdicated his throne in 1936, "because I cannot live without the woman I love", is being severely criticized by a British member of Parliament, who holds that the Duke has done nothing since he left with the life of ease, idleness, and social inertia. the life or ease, sineness, and social inerview.

—and similar types of "doing nothing".

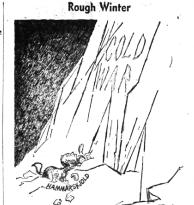

The Duke's wife, the former Wally Simpson, has written in defense of their conjugal bilss. (Well, somebody once exclaimed "All is not gold that glitters".)

THESE MUMS ARE known as the Bird Mums, and each will give he owner the bonus of winter hardiness, plus a heavy production of flowers. They have been named after the different bird color benefit of the burnings of many choice birds. Either spring fever has taken over in my bones or the catelogues have given me new pep, but I have nearly over for gardners. Live it up while you may.

STRICTLY FRESH

The fellow next door has had 50 pounds of muscle-building equipment mailed to him every week for the past year. We haven't noticed much of a change in our neighbor, but we now have the world's most perfectly developed mailman.

One Thing or Another BY GEORGE WM. AVERILL

There's a mighty big difference between a prayer and a speech. Too often today the introductory words "Let us 'pray . ." lead into speeches.

The best prayers are simple ones. They are short. They are meaningful.

Christianity's greatest prayer (Matt. VI:9-13) contains only 66 words. It requires less than 30 seconds to say.

A philosopher is one who can look at a stony field and see the good earth.

When you are angry, you risk doing something you'll ever regret.

We've got a friend who is saving his money.

City Beat

KEN

If all goes well, that man in Rio who has shown so much interest in Birmingham is going to have visitors from our fair eit.

Mr. and Mrs. Clarke F. Andreae, 919 W. Glengary Circle, planned to leave by air Tuesday for New York and a three-week trip to South America. We say "planned" because their departure date hinged on settlement of the airlines' strikes which plagued the nation and metropolitan area last week.

week.
"That man in Rio" is Tobias Juca de Castro, a self-styled ambassador of good will in Rio de Janeiro, Brazil, who has been communicating with Mayor Florence Willett and The Eccentric.

VISITING TOBIAS was Mrs. Andreae's idea— s a last-minute surprise for her husband. He's

for it, too.

"I thought that would be kind of fun," she declared.

cared.
"It'll be interesting to see what he's like." "ICII be interesting to see what he's like."
The Andrease will spend one week in Rio; then
will fly to Montevideo, Uruguay; will spend three
days in Trainfaid; and will visit San Juan, Puerto
Rico, for a week.
"We've never been south of Jamaica," said Mrs.
Andreae. "I'til be different and fun for us, I

Andreae. think."

IN SAN JUAN, they'll call on the mayor, "a

and ALAA, they it can on the mayor, "a

goodwil, like our Mr. Castro"—whom Mrs. Willett
that a recent mayor's convention in New York.
The Andrease will take with them pictures and
brochures from Birmingham schools, the Chamber
of Commerce and The Eccentric to deliver to
Tobias.

MAYOR WILLETT has written to thank him

He figures it may be valuable again some day

Even camels get thirsty. And eagles perch.

Then there was the peasant whose son was a farmer and whose grandson today is an agricultural expert.

People who really are important don't have me to act important.

All people are born equal. But some work harder than others.

Can you recall the last time you did something or someone else out of generosity, not self-gain?

for the many books and magazines he sent here for Baldwin Library and to tell him to expect a visit from the Andreaes.

Mrs. Andreae's husband is president of Peninsular Diesel, Inc., his own firm, which is a distribution-hip for Detroit Diesel.

Experiment of the sells and services diesel engineering means that he sells and services diesel engineering means that he sells and services diesel.

BIRMINGHAM'S PARKING lot development

BIRMINGHAM'S PARKING lot development drew strong words of praise from City Commissioner Charles W. Renfrew last week. His remarks came at the conclusion of the "courtroom scene" on the northwest quadrant let. Said Renfrew, "I believe parking lot devolopment is the most progressive thing Birmingham has ever undertaken.
"I have seen evidence that it has been for the betterment of the eity, that it is a progressive and sound development."

SPEAKING OF city commissioners, Robert Page had a point to make last week, too, He wants, as little more detailed information on the bills submitted for approval each week, "I would like a little bit more information," Page emphasized. "I have more than just a casual interest in \$134,000 in bills" (last week's total). Other commissioners, who have been in office a longer period of time, felt that the present procedure suffices.

After some discussion, it was agreed that Page and City Manager L. R. Gare would work out a solution.

solution.
"This is not a reflection on the administration,"
Page stressed, "I don't look at it that way at all."
"I don't take it that way," replied Gare.
That's what we like, congeniality.

Talk of the Towns

This is the month for kites, red, white and blue pinwheels on a stick and balloons. There's one youngster in Beverly, Hills who was really having a gay time with a balloon this week. The sight of such a taken-for-granted toy started a bit of research shawing a gay time shaw. "For every action there is a reaction, equal in force and opposite in direction."

Sir Isaac Newton noted this back in 1680. That small observation is what is putting jets and missiles and sputisis into orbit today.

Blow up a balloon, release it and see it travel jet propelled. The air that escapes from the opening is "the action." The force pushing against the front of the balloon is the "reaction." America, this reaction now has a new name—thrust—and it is responsible for pushing either a jet or a balloon through the air.

The process of perfecting this thrust has become so complex, that it is now one of the most competitive races apurring nations today. A penny balloon started it.

Five out of six members of The Birmingham Eccentric news department write about sewers at least once a week.

They take the Art Carney attitude. You know—it's all part of the job.
Photographer Marv Stasak thinks the news department is crazy to be so concerned about "little things like sewers."

When digging started last week on a sewer project in Lathrup, he was sent out to get a dramatic photograph of the big event.

He came back with muddy shoes, spattered trouser cuffs, a smudged face and a dusty camera. "Now I feel like I belong here!" he said with an exhausted sigh.

It's heartening to hear a legislator shout out und that there really is a line dividing Individual reedom and Governmental Interference. A Beverly Hills councilium objected strongly ast week to a suggestion made by one of his

fellow officials.

"There's such a thing as too much government" he stated firmly.
