The Day PAYDAY CAME ON TUESDAY

Tuesday wasn't a real payday. But the money was. It was the first dividend check from an investment program this man started just a few months back.

The man isn't rich. He isn't a stock expert. But he *is* an investor, one of 12,000,000 who are sharing in the nation's industrial growth through investments.

Most of them are in the $5,000 to $10,000 income bracket, and many of them systematically set aside a portion of their regular paychecks to invest in income producing securities. The result: *extra* paydays . . . regularly throughout the year.

If you would like to know how to introduce extra paydays into your future, now is the time to discuss an investment program with a Watling, Lerchen & Co. representative. Call or visit us today.
