Houses First Art Show

Imaginative dreams are taking shape at Birmingham's former sewage disposal plant. Currently the building at 1510 S. Cranbrook is housing its first regular art show, the annual exhibition of work by members of the Women Painters of Birmingham. The building was occupied last June by the Bloomfield Art Association, which is transforming it into a Birmingham Arts Center. Installation of flooring over former open sludge tanks, heating, light and paint on the walls have accomplished the initial stage of the transformation. The current exhibition is open from 2 to 5 p.m. daily except Monday, through Dec. 2. The Art Association's annual Members' Show and Christmas Sale opens at the center Dec. 10.

7 Delegates To Review Convention

Oakland County's seven Constitutional Convention delegates will review their progress to date at an informal meeting in the Community House to which the public is invited Friday evening, Dec. 1. Thoburn H. Wiant, president, has announced.

The briefing is the first in a new "Meet Your Celebrity Neighbor" series at the Community House designed to acquaint residents of the Birmingham-Bloomfield area with individuals and issues of common interest.

Through this informal type program, the Community House hopes to provide a forum whereby residents can better acquaint themselves with the views of many outstanding people.

THE MEETING will begin at 8 p.m. There is no admission charge.

A joint venture of the Community House and the Oakland Citizens League, the meeting will bring together delegates from the county's six districts, as well as occasional district delegates. George Romney, who is one of three vice presidents of the Constitutional Convention.

Wiant and W. Laurence Shaffner, president of the Citizens League, said the meeting would include a question and answer period between the delegates and those in attendance.

Detroit likes action...and Buick's got it!

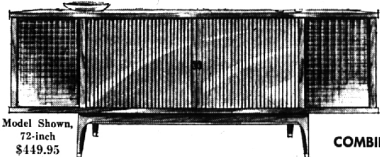

Lion with a kitten's appetite... Here is one lion that never calls for "seconds"—the Buick Special with Fireball Aluminum V8 engine. It subsists on the daintiest helping of regular gas. (Topped its class in the 1961 Mobilgas Economy Run.) But the performance is another story altogether. Call for action and you'll get it—and fast! How can this V8 that's so stingy on gas shoot the works on performance? The answer: lightweight aluminum that cuts down on gas consumption by cutting down on weight—not performance. Why not investigate?
