

Charming Dolls 'Almost Human'

This Christmas dolls are more like people than ever before. Any such happy surprises for doting doll mothers as a doll that really kisses with a good loud smack are included in doll collections.

Infant dolls are more embraceable that ever; new adaptations of plastics give a soft pliant quality to arms, legs and neck, characteristic of the new-born baby.

DOLL FAMILIES are real playmate size, with muscular flexibility paralleling real youngsters on the score of agility.

A fascinating array of miniature dolls in the 8 to 12-inch categories are exponents of the latest fashions. New boy dolls too, are outfitted in ivy league styles.

Nowadays little girls have a wider scope of experience than ever before, thanks to extended travel and TV viewing.

In tune with this sophistication in the playground—dolls, too, are outfitted for a wider-than-ever round of sporting and social activities.

They boast airplane style luggage and smart travel costumes, with wardrobes for skiing, ice skating, dude ranch fun, as well as outfits for school and ballroom.

Meticulous detail is lavished on infant doll care kits. These help provide a basic course in baby care which should prove useful for the

Scale Model Building Kits Are Gift Idea

Kids who have discovered a fascinating sense of achievement in building scale models of rockets and planes, ships and trains, are forever eager for new fields to conquer.

The "why's," "wherefore's," and "what makes it run" are answered as boys and girls too—along with their parents—carefully and meticulously assemble their exciting scale models.

AN EXAMPLE OF this type of product is an exact miniature of a real automobile engine in kit form.

Produced by Revell, Inc., this one-quarter-scale kit of a Chrysler Slant Six automobile can be assembled into an actual operating model with spark plugs that "fire" and can be retimed.

Part for part, it is identical to the full-size prototype and can be disassembled and rebuilt repeatedly just as the real engine.

Although it is great for mechanically inclined boys, it will also be appreciated by motor-minded adults in every age group.

IN THE FIELD of science, Revell's "Chicken Little" makes the mysteries of natural science more fun than anybody ever dreamed.

When this kit is put together, the youngster has constructed and learned the life span of a chicken from the fertilized egg to the baby chick.

EACH OF THE seven stages in the development of the chick comes with its own transparent egg shell and is a separate construction project.

Chicken Little can be taken apart and can be reconstructed for permanent study and display. It is said to answer all questions about how a chicken is born, except "which came first."

For a Happy Note, Try a Chord Organ

Why not a portable electric chord organ that will enable youngsters and adults to take their music wherever they go. Its 28 full-size keys and 12-button chord panel are specially keyed in a simplified playing system to a music book of hymns, marches, classics and popular tunes.

The organ affords youngsters an early opportunity to experiment and develop in this artistic field with true musical tones produced by precision-crafted stainless steel reeds.

young doll mothers later in life. Little girls will love the wide variety of doll furniture planned to fit different sizes of dolls. Conventional doll beds quickly turn into auto beds and new luggage is designed to carry all dollies' possessions.

MOST SPECTACULAR new developments are the child size replicas of home furnishings in fiberboard.

A new method of tough interlocking construction makes these bedroom suites and reproductions of the latest kitchen appliances entirely practical for hard play.

Beds and vanities and wardrobes are provided to fit the dolls that now have "grown" to be 36 or even 40 inches tall.

A Different Tricycle For Small Drivers

An exciting child's present on three wheels is the new twisty trike. With its unique hand control on the handlebar in normal position, twisty trike gives a conventional ride.

But by pressing the lever while riding, both back wheels are released to spin, twist and turn in any direction. Result: a really different ride for small fry. The sturdy steel trike, has semi-pneumatic, puncture-proof tires and is handsomely finished in flamboyant red with white trim.

Both fantasy and realism are significant trends in the stuffed animal section of Toyland.

Youngsters may fondle replicas of their favored pedigreed pooches or felines, or cuddle up to fantastic animals inspired by cartoon characters or sheer imagination on the part of designers.

The topmost ornament on a Christmas tree is called a gipfel.

'Thumb' Doll

Even very young mothers wonder what makes babies suck their thumbs. This little miss knows why. Just turn Thumbelina over, wind the key in her back and her thumb will head for her mouth. Not only that but this baby doll will grasp her tiny toes and stretch, just as though she were a real, live infant.
