Along with the Bell System's participation in space exploration, space communication and national security, we have developed two programs on these subjects. One is a 10GM film entitled "Voice For Mercury" and a lecture-demonstration, "Communications and National Defense—their role in space exploration." Both are available for showings before public groups. If you are interested in seeing either program, call us on telephone number 546-9941 and we will be glad to make arrangements.

**YOU'RE GOING TO be hearing more and more about Bell Telephone scientists' work with a revolutionary device called the Optical Maser. It transmits the narrowest light beam ever achieved, along which can be sent enormous numbers of messages—many, many times more than by wire, cable, or radio. Light may become a whole new medium for telephone talk, TV images and data communication. It's constant research like this that makes possible the latest telephone service improvements for our customers at the earliest possible time cost.**

**GOOD IDEAS** are valuable and at Michigan Bell our Employee Suggestion Plan is providing lots of good ideas on how we can serve you better, faster and even more economically. Last year, for instance, Michigan Bell employees came up with over 2,500 suggestions on how to do things better. For each one accepted the employee gets a cash award. So good ideas pay off in three ways: to the employee, to Michigan Bell which gains better methods of operation, and to you who enjoy the benefit of even more efficient service.
