*You could buy it for safety alone!*

It's the dark of the night—and an unfamiliar turn lies in wait.

Suddenly, at the gesture of the turn signal, the whole area is bathed in a brilliant flood of light—and the driver negotiates the corner smoothly, surely and safely.

This is Cadillac's new cornering light in action. And it is yet another reason why owners tell us the car is worth its whole price in safety.

Consider, for a moment, the safeguards

that attend you in this latest "car of cars"...

... design and construction so sound that you travel the highway in a veritable fortress of glass and steel.

... craftsmanship of such care that the car approaches the absolute in dependability

... performance that is so rewarding and so effortless that the driver remains fresh and alert at the wheel over even the longest day's drive

... a braking system that gives both front

and rear wheels their own power to stop

... safety power steering ... padded instrument panel ... three phase rear lighting system ... and a myriad of other features.

If you haven't driven a 1962 Cadillac, you've been missing something very special—and you should not postpone the experience.

You can buy the car just for safety, if you wish. But you'll also discover a dozen other wonderful and exciting reasons for wanting to make it yours.
