Area Boy Scout Council Maps Plans for Future

"With its ear to the ground and eye to the future," the Clinton Valley Council of the Boy Scouts of America is already quietly laying the groundwork and guidelines for its needs and activities 20 years hence—and the group is doing this by taking a liberal dose of BSA's own "preventive medicine!"

The Council, looking ahead today toward tomorrow and its vastly broadened challenges and responsibilities in serving boyhood of some 75 communities where the organization operates, is putting into practice Scouting's famed slogan—"Be Prepared"—to the letter.

In fact, the group—which delivers and administers the Scouting program through some 260 units to nearly 10,000 boys in most of Oakland and Macomb counties—has been wading "up to its eyebrows" for nearly two years now in a comprehensive, far-reaching long-range planning-forecasting program.

FROM THIS SEA of facts, figures and statistics is emerging a purposeful program for further development and growth of Scouting in the two-county area.

"Principal purpose of this effort," says John W. Hunt, Council president, "is to determine and project now, as accurately as possible, the increased resources and facilities which will be required to effectively bring Scouting to some 25,000 boys in our area during the next 20 years."

He thus expects a 150 percent membership increase by 1980; and to take care of this growth "will certainly take a lot of doing," he adds.

As the local "arm" of the national scouting organization responsible for Scouting in most of Oakland and Macomb Counties, the Clinton Valley Council is composed of four districts in the two-county area. They are: (1) Pontiac District, which includes Pontiac and Sylvan Lake; (2) Manito District, comprising northern Oakland County except the city of Pontiac; (3) Ottawa District, covering southern Oakland County except Pontiac, Royal Oak, Southfield, Bloomfield and Troy townships; and (4) Macomb District, encompassing all of Macomb County except Warren, Erin and Lake townships.

Two years ago, the Council formed a Long-Range Planning Committee and appointed Frank R. Chapman, Council vice president, as its chairman. The veteran scouter—a Scoutmaster for 15 years himself—is a retired architect.

UNDER HIS GUIDANCE and direction, this committee—made up of a dozen other volunteer professional and businessmen collected, correlated, digested and assimilated by the utility companies, and figures compiled by the Greater Detroit Metropolitan Planning Authority.

Today—some thousand travelmiles, scores of meetings and hundreds of hours later—his committee has come up with a long-term plan that gives the Clinton Valley Council a "roadmap" showing clearly defined specific routes the Council must take to achieve its future growth and development objectives.

In essence, the study offers an example of what competent volunteer workers of a civic or service organization can accomplish in their own spare time through the the adaptation and utilization of modern business techniques of market research and statistical analysis.

"Too often we become so involved with day-to-day problems that we tend to neglect or overlook the need to look and plan ahead," says Hunt.

THE STUDY ENCOMPASSES two parts principally. The first—a population study and a prediction of membership growth in relation to population—has just been completed. The second—a factual projection of financial, facility, equipment, and manpower requirements based on anticipated membership—still lies ahead.

Already the conclusions of the first phase of the study are both clear and far-reaching, the Council president declares. To underscore them, he cites these figures:

"Today, in an area of approximately 435,500 people, there is an available 'boy crop' of a little over 48,100. With a membership totaling nearly 10,000, we are presently reaching about one out of every four boys in our area.

By 1970, when the available boy crop will total nearly 64,000, our study indicates that we must be prepared to serve nearly 14,000 boys and by 1980 almost 19,200. This represents a growth rate of 21.3% as compared to the present national average of 24.4% of the available boys recruited into Scouting."

The council already has established a number of goals based on this long-term plan. They are objectives which, Hunt says, are "necessary and can be achieved with the understanding and full-fledged support of all those who are interested in furthering Scouting in Oakland and Macomb Counties."

Develop Junior Colleges for Better Education

Junior colleges must provide education for both high school graduates planning to work and for those heading for universities, says Associate Prof. Norman Harris of The University of Michigan Center for the Study of Higher Education.

"That's the only way to face national problems realistically," he states. "Seventy per cent of students of junior college age will find their life careers in fields requiring technical-vocational education."

HARRIS REMINDS, "The lower-order tasks are becoming more and more complex with each passing year."

The U-M educator raises two questions: What is to happen to all the lower-level ability persons? and How can we identify and educate enough high-level persons?

The answer to both of these problems seems to be a full-scale development of the community junior college, says Harris.

"THE SUGGESTIONS some educators are making to eliminate occupational education from the public schools and return to the academic curriculum of the 19th Century are as nonsensical as they are dangerous," he declares. "This would only widen the gap between those who lead—the professions—and those who serve the rest of society.

"This gap needs to be narrowed in the 1960's, not widened. Obviously, it must be narrowed by more education for the technical student. Not only does the success of our economic system depend on narrowing this gap, but in my opinion, so does the future of America. No democracy can afford an 'elite' set apart from the 'masses'—perhaps least of all an intellectual elite."

Forest Drives More Scenic ThanHighways

Motorists traveling in northern Michigan this summer, who get tired of just "pounding the pavement," are invited to get off the beaten path and enjoy the sights along six state forest drives laid out by the Conservation Department.

The drives, five of them new this year, are self-guiding. They take tourists past multiple-use activities of the Department, scenic spots, and other points of interest.

Rusic signs are being posted throughout these drives to identify such things as timber harvest areas, plantations, winter deeryards, wildlife openings, research plots, historic and scenic views.

THE NEW motoring routes are located in Pigeon River State Forest, down Jordan River Valley, between US-131 and M-66, near Alba (14 miles);

Mackinac State Forest off M-28, south of Newberry (24 miles); Lake Superior State Forest off County Road 407, northwest of Newberry (13 miles), and Sturgeon River State Forest, Carney Lake drive, off M-95, four miles north of Iron Mountain (20 miles), and Silver Lake-Floodwood drive, off M-95, 30 miles north of Iron Mountain (35 miles).

A DRIVE opened to motorists last year in Houghton Lake State Forest is being extended 10 miles to run through the department's Houghton Lake wildlife experiment station.

Its 30-mile route starts on M-55, midway between Houghton Lake Village and Prudenville.

From here, it runs south and circles west across new US-27, then continues north to M-55, three miles west of Houghton Lake.

Plank Roads First Tried In Michigan

For several years, Michigan has been the leading state in the nation in building its share of the interstate highway system. As the No. 1 roadbuilding state, Michigan is following a tradition that goes back more than a century.

The state was one of the first to experiment with plank roads. In the 1840's, Michigan had 121 companies chartered for the purpose of building toll roads out of wood. For the time, these roads were actually well designed and earned the name "pleasure roads" from travelers accustomed to mud ruts and unfinished cobbles.

The railroads, however, brought an end to the plank road boom and many companies never built the roads their charters called for.

WORKMEN DIGGING a sewer excavation near Lansing recently uncovered a 100-year-old highway scandal. The workers came across old logs, six feet below the present surface, and reported the findings to the Michigan Historical Commission. The logs were part of a plank road between Lansing and Howell. Records show the road was built in 1853.

Historians also found that the contractor on this early highway project cheated on specifications. When the legislature charted the company it was understood that oak logs would be used to fill soft spots in the road because of their weight and durability. The logs uncovered by the workmen were of cheaper, softer pine.

Pennants to Fly North of Cadillac

The State Highway Department will extend its experiment with pennant shaped no passing signs to a 10-mile stretch of US-131 north of Cadillac.

The Highway Department said the continuing study will measure the effectiveness of the new signs which underwent their first test last year on US-27 in the Gaylord area.

Early this year, a similar test was started on US-27 north of Marshall.

Highway Department traffic engineers say the experiments may bring a sweeping change in signs marking Michigan's no passing zones. This depends on how motorists react during the tests.

Sheridan Wins Orchard Lake CC Club Championship

James T. Sheridan, defending champion, won the 36-hole Orchard Lake Country Club championship 4 and 3 over Dr. F. M. Adams July 29.

Sheridan will reign as continuing club champion for 1962.

Couples Tie in Two Events at Springdale

Mr. and Mrs. Bob Gent and Mr. and Mrs. Doug Fairbanks tied for low gross of 42, and low net with a Score of 37, in the Scotch Foursome at Springdale Sunday.

Jine Human won the longest drive event for men and Mrs. Fred Cudici captured the women's longest drive prize for the second time in two months.

Other special event winners were Mrs. Bob Hoenk, H. Lowe and Mr. and Mrs. Joe Obey.
