In addition to Mrs. Finnegan, the other vice chairmen are Harry Hirsch and Fred Ginsberg of Detroit, Mrs. Helen Howard of Grosse Pointe and Mrs. Leo Greene of Flint.

ROMNEY SAID the inaugural day would begin with a morning ceremony, an official luncheon, a reception and the inaugural ball on the evening.

**NEW YEAR'S EVE DANCE**  
 The student committee for the Senior High New Year's Eve Dance is sponsoring a Christmas party last week to begin preparations for this year's dance. Co-sponsored by the Recreation Board and Community Center, the dance is an annual highlight of the holiday season for the high school students and returning college students. The dance will be held on Monday, Dec. 31 from 9:30 p.m. to 1 a.m. Announcements concerning theme, decorations and tickets will be forthcoming.

**ADULT BASKETBALL LEAGUE**  
 The Twin-City men's basketball league sponsored by the Birmingham Recreation department and the Southfield Parks and Recreation department has seven teams which will begin league play on Monday, Dec. 17. Representing Birmingham will be the following teams and their managers:

"Boomerangs," Carl Pendrick; "Center Lounge," Jack Peddie; "Torrence Oil," C. A. Adams.

"Flams" will play in Southfield on Monday nights at the Derby Junior High Gym.

**SENIOR MEN'S CLUB**  
 The Birmingham senior men were guests of the Senior Men's Club of the Bushong Congregational Church on Southfield Road in Detroit at one of their recent meetings. Lunch, bridge and shuffleboard were the order of the day. Not much is to be said of the prowess of the Birmingham men on this occasion but they did enjoy good fellowship and had a good time.

At last Friday's meeting of the Senior men in the Ranch Room of the Comany House, Mrs. Heulah Whitty, well-known social worker of Detroit, enlightened these men with many well stated facts about the racial situation in this Detroit Metropolitan area.

The program scheduled for Friday the 7th of December includes a talk pertaining to the economical aspects of the Common Market by Dr. Karl E. Rombach of the German Consulate in Detroit.

Not all birds are able to fly. The number of species of birds that are alive now or have been alive within the last few hundred years is estimated at 8,500. About 45 of these are unable to fly. The ostrich, the penguin, the kiwi, the emu and many others.

**THE COUNCIL** will continue study of the report to see whether plating of the land merits an ordinance. Cogger said he felt the charter should not be used as a standard for plating and that an ordinance could supply such standards.

Councilman Vincent Zetell and John Kohl said there was too little land left to justify an ordinance and that the rest of the city provided a pattern for plating.

**CITY ADMINISTRATOR** Jerald Stone reported progress on protection of children crossing in front of St. Bede's School on 12 Mile.

**THE COUNCIL** authorized Stone to pay overtime to Lathrup policemen so that their schedules at the morning change of shifts would be unaltered. Such action would enable policemen to help children cross streets near the school and at the same time provide police protection for the rest of the city.

Stone said the AAA and the state police had both been asked to make crossing surveys and the county had been asked to provide additional traffic safety signs and signals. Crossing lines have been repainted on the road, Stone said.

**He Who Bags Canada Goose Has Status**

A hunter lucky enough to get a Canada goose has bagged himself a real "status symbol," says George Hunt, University of Michigan assistant professor of wildlife management.

"As a trophy, this handsome game bird is practically on a par with a well-entitled buck deer," says Hunt.

THE LARGE, spectacular bird is gray-brown in color with black tail. A broad white patch extending from the chin region up into the front side of the black head has given this bird one of its common names, "white-cheeked goose."

They may weigh anywhere from seven and one-half to 15½ pounds and are good eating.

Strong flyers, Canada geese can fly up to 60 miles per hour and can cover many miles without having to stop. They are also good runners and strike powerful blows with their wings when attacked.

"THE INCUBATION period is usually four weeks and from five to six eggs are laid," Hunt said. "The male stays near the female through this period and helps with the raising of the brood during the rest of the summer."

"The nest, made of grasses and down from the bird's breast is cupshaped. Sometimes they will use abandoned nests of hawks or eagles or even an old beaver house placed above the surrounding vegetation so danger from predators can be spotted readily."
