The Child Who Points with Pride to His Shoes from Hornung's

perhaps has worn Hornung's shoes all of his life. The regular trip to Hornung's has been traditional in his family, a part of growing up, as it had been possibly for one or both of his parents.

Good shoes, correctly fitted, mean that his feet have been properly supported from the beginning, with a fine regard for individual foot structure, rate of growth, the need for carefully calculated support.

Hornung's shoe experts recognize that the foot is a delicately constructed and highly important part of a child's body. They, too, point with pride to Hornung's better shoes and the expert fitting service which is part and parcel of the Hornung tradition.
