County Civil Defense Needs More Money

More increases in the Oakland County Civil Defense budget are necessary in order to build a realistic defense program, according to the Oakland County Civil Defense officials.

Meeting Saturday at Rochester, Mich., officials noted that the increase from \$47,000 in 1961 to about \$70,000 for 1962 is not adequate.

President of the Northeast Oakland County Civil Defense Council, Dr. Edgar J. Geist, M.D., compared the county's provisions to that of a comparable county in New York.

HE SAID New York's Monroe County has 600,000 persons as compared to Oakland County's 700,000, but explained that Monroe County has a 1962 operating budget of \$236,000, much larger than Oakland's.

"Monroe County has a Civil Defense staff of 23 full-time and 23 part-time employees," Geist said. "Oakland County Civil Defense has seven full-time employees."

An appeal for more individual response to the hazards of nuclear attack, how to protect themselves from fallout, how to stock home shelters, where community shelters are located and how to determine when it is safe to leave shelters.

State CD programs are also lacking, said Geist. "One may argue that we have done much in the past two years, but if the question were put forth, 'Is it enough for a nuclear strike on Detroit?' the factual reply would be embarrassing," he said.

Geist and others placed blame for inadequate programs on public apathy.

Michigan Mirror 'Middle-Agers' Neglect Health

By ELMER E. WHITE
Michigan Press Association

Are you one of the "neglected" segment of the American population where health is concerned?

"We're neglecting the middle-age segment of our population in our concern for the health of the young and the very old," contends Dr. John A. Cowan, director of the State Health Department's Division of Tuberculosis and Acute Health.

What Cowan calls "health conservation" measures should be stressed among the 20 to 45 year age group. These measures primarily consist of periodic health examinations.

MANY CHRONIC diseases which afflict persons in their later years could be prevented by early detection and treatment in the younger years when the individual subject is apparently healthy and not concerned about the prospect of chronic disease conditions, Cowan recalled.

"If we would only apply the knowledge that we have today in preventive and curative medicine, much of the chronic illness and disability present in today's aging population could be dissipated," he said.

THE USES of electronics in state government are becoming more and more varied almost daily.

Now, officials relate, an electronic reporting system will be used extensively next year to keep members of the tourist industry informed on the demands being placed on the industry.

THIS NEW electronic reporting system was used briefly this past year at State Highway Department Tourist Information Centers, reports department information

some gradation, advise, myself; but, upon deep meditation, interspersed with numerous soliloquies, I decided not to—why should I give him some of my secrets? I thought that I so successfully used to bring that famous Red Keg team to victory over adversity?

"Who's the Red Keg? Why, Reader, it once was a very big and busy early Michigan lumber camp, situated on Michigan's Tittabawassee River, near Midland, its modern and present name is just like mine: AVERILL."

WHILE COACHING that team, I developed a variety of football shapes and confrontations; for example, when playing against the Coleman team up there in Midland County, I used a football that was much blunter (or should I say "more blunt") on one end than the other.

The ball thrower, after looking over the arrangement of his own and the opponent's players, would quickly decide which end of the ball should go ahead of the other end, his decision depending on the distance he wanted the ball to go to reach his own receiver.

(This idea later was adopted by space scientists in order to slow down, by using retro-rockets on the capsule, so that it would re-enter the atmosphere without burning up.)

I ALSO DEVELOPED a ball pattern that looked something like a squeezed-in middle elongated doughnut; this caused the ball to fit and flicker, but also gave our players a protruding portion of the ball to grab hold of. These two patterns are only part of the entire roster of tricks Old Red Keg used, to deceive opponents. (Naturally, we had to have the referee on our side whenever we used this style of play.)

Several of the tricks I manipulated by electronic remote control. I could, quite as a half wack, deflate the ball when an opponent appeared about to catch it on a long pass, or I could blow it up so large that an opponent couldn't catch it and hang on to it.

One of my best tricks was dubbed by the various newspaper wire service reporters as "The Red Keg Twist." Again, electronically, I could cause the football to swirl, twirl, or spin about like a top in flight, often getting it into the hands of our champion ball receiver whose momentary position was far removed from an opponent tacker.

IF YOU LOOK UP old-time sports history, you'll find mention of the famous Red Kegs—but I personally didn't like everything they said about my team... especially when they said about my being kicked out of football because, as Kennesaw Mountain Landis then declared: "Averill, you'll have to quit your 'trick' (kick) to introduce such stuff into the future of baseball!"

(That's why, folks, I resigned from Red Keg—now on the map as AVERILL.)

"Sorry, 'Bump,' that I can't offer my help to you this (or any other) season."

Beverly Delays Action On Drains in Village

BEVERLY HILLS—Two propositions concerning drains were considered by councilmen Monday night.

The South Berkshires drain question was put on the agenda for a next regular council meeting Nov. 19. People in the area, as well as association presidents, will be notified.

A request from the City of Southfield asking Beverly Hills to join in petitioning the Oakland County Drain Commission to establish and carry storm water originating in the county was denied.

LATHRUP, SOUTHFIELD and Beverly Hills are the three communities involved. If any two sign the petition, the third is obligated to participate in it.

The drain would run a distance of 18,000 feet in the Evans District and in the area of Northwestern Highway from 10 1/2 Mile to 13 Mile Road. The total cost of the program would be between \$75,000 and \$100,000, with the village's share at 10 per cent of the cost for the 300 acres involved within its limits.

The unknown costs and the fact that storm clean-up is already underway in the village were reasons given for denying the request.

IN OTHER BUSINESS, the question of roll curbs where two subdivisions about one another brought a motion to amend the street paving specifications as proposed by Johnson and Anderson, the village engineers.

The curb will be specified as an alternative, but continuity must be maintained on curbing where subdivisions abut each other.

The developers of Westwood Subdivision were advised to submit a petition for rezoning several lots in the sub at 13 Mile road and Evergreen.

A BID OF \$156,192 by H. Dawson Ford was accepted for the village police car. It will be white in color.

The West Beverly Hills Association stated they had no objections to the dividing of a lot on Roseview into four parcels, the council approved the proposition submitted by CFTwood Homes, Inc.

Dr. Sidney Miller, of 800 Adams, Birmingham, has been appointed a representative of The Johns Hopkins University National Alumni Schools Committee. In this capacity, Dr. Miller is visiting local high schools in Birmingham.

Scouts Honor Area Leaders At Annual Fete

One hundred fifty-five Scouters and their ladies attended the recent annual meeting of the North Trails District, Boy Scouts of America, held at the North Congregational Church, Southfield.

Two adult area Scouters were accorded distinguished Silver Beaver Awards, the highest honor that can be bestowed upon an adult volunteer leader by the Detroit Area Boy Scout Council. The awards, given in recognition of outstanding and meritorious service performed on behalf of the youth of our community, were presented to Guy Holloway, 755 Ardmore, Birmingham, and Leonard J. Lamb, 2240 10 1/2 Mile Road, Southfield.

Dr. J. "Bud" Rozema, director of personnel and executive secretary of Campbell-Ewald Co., and executive board member of the Detroit Area Council, told the gathering that the Silver Beaver award is an award that seeks the man—the man cannot seek the award.

19 Committees Study Phases Of Curriculum

Nineteen curriculum committees involving over 250 professional staff members of the Birmingham Public Schools are currently evaluating all phases of the instructional program in making recommendations for program improvement and implementation.

Each standing committee evaluates in terms of content, supporting materials and textbooks and teaching methods and techniques. The committees also suggest in-service programs for the teachers who work in those subject areas where recommendations apply.

The evaluation begins with the committee's review of long-range plans, as stated in the previous year's report, and development of recommendations for the coming year. The recommendations for the 1963-64 school year are due January 1, 1963. They will then be reviewed for budget implications, prior to adoption.

COMMITTEES AND chairmen are elementary art, Marjorie Heckman and Mrs. Velma Ruby; kindergarten, Mrs. Velma Ruby; language arts, Mrs. Naomi Erdmann; social studies, Ed Bokowski; secondary business education, Earl Stein Steinhardt; driver education, David Gottschalk; home economics, Arthur Kereses; mathematics, Arthur Kereses; social studies, Kenneth Cook.

Committees organized on a kindergarten through 12th grade basis include art, Howard Malwitz; audio-visual, Henry Corbach; foreign languages, Mrs. Louise Couture; library, Mrs. Margaret Grazer; music and instrumental music, Arnold Berndt; physical education, Frank Whitney; science, William Forbes.

Motorists Drive 9 Billion Miles During Summer

Motorists logged a record 9.6 billion miles of Michigan highways in the summer of 1962, the State Highway Department reports.

Deputy State Highway Commissioner Howard Hill said traffic during June, July and August was up nearly 800 million miles for an increase of more than six per cent compared to last summer when the previous mark was set.

The average summer increase since 1950 has been 280 million miles.

Michigan's new freeways continue to stimulate new traffic, collecting and distributing travelers bound for all corners of the state," Hill said.

LAMB, a neighborhood commissioner serving Southfield, has been active in Scouting for over 12 years, having served as a Scoutmaster. In addition to the Silver Beaver he holds the Scouters' Award and is a member of Corps No. 5.

Holloway, who was named at the annual meeting to succeed Kenneth Thompson as the new North Trails District chairman, has a long and notable tenure of service to Scouting and many other worthwhile community organizations. His record of service to Scouting includes that of Assistant District Commissioner, Community Commissioner, District Executive Committee member, Co-chairman Sustaining Membership Committee, and District Vice-Chairman.

The North Trails District covers the area from Eight Mile Road north to Pontiac, and from Woodward Avenue to Inquirer Road on the west. 1,575 adult volunteer leaders serve 2,296 Cub Scouts; 2,042 Boy Scouts, and 215 Explorers in a total of 123 units in the District.

The assembled Scouters, ladies and guests heard the featured speaker of the evening, Dana Rose, vice president of Michigan Bell

Telephone Co., challenge them to increase the number of opportunities for boys to become Scouters. Rose called attention to the need for trained leaders who can serve their community, their nation, and the world, by providing the type of leadership for the youth of today that will result in good adult leadership in the tomorrow to come.

James Maunders, 9175 Idlewild, Birmingham, chairman of the 1962 District annual meeting, was most honored in the large, turn-out for the dinner program.

TRAFFIC WAS UP more than eight per cent in the northern half of the Lower Peninsula—the area north of the Muskegon-Tay City line, but not including Muskegon, Bay and Midland counties.

There was a similar increase in the eastern and central portions of the Lower Peninsula, an area that includes the Thumb, Battle Creek, Jackson, Lansing, Midland, District Executive Committee member, Co-chairman Sustaining Membership Committee, and District Vice-Chairman.

Metropolitan Area was up 4.5 per cent while Southwestern Michigan—an area that includes Grand Rapids, Muskegon, Kalamazoo and the Benton Harbor-St. Joseph region—had a one per cent increase.

In the Upper Peninsula, traffic was up 2.8 per cent.

Hill said traffic figures for June and July are based on gas tax revenues while the August figures are "conservative" estimates based on information collected at traffic recording locations throughout the state.
