

## Lightfooted

Delicately tinted beige stockings are designed to be worn with whites, off-whites, creams, beige and bamboo tones—and the very palest of pastels.

## Be Slimmer, Trimmer For Coming of Skimmer

Count those calories!  
Don't skip the exercises!  
And don't bypass the foundation

department for those gentling line tapers, because spring '63 is going to be one of the slimmest fashion seasons in years!

"Slim", "skimmer", "soft", "light", "natural", "pretty", "supple"—these are the words that describe spring fashions. When you see the clothes that inspired them—right in your local stores, you will add another word of your own. It will be "wonderful"!

TO BE OUT of shape is to be out of fashion when the leading dress silhouette is the beltless, unbroken skimmer, when emphasis is on the hips with low-placed, torso-styling, when supple, eased fashions depend upon the figure under them to give them shape, when coats hang straight as rajah robes or are more demi-fitted to the figure.

THE WEIGHT of all spring fashion is light, lighter, lightest!

Fabric mills subtract ounces from coatings and suitings by added cotton, silk or synthetics. They have styled 100 per cent silks and cottons to look like tweeds and worsteds and feel like air conditioning.

### Bright Extras

Brighter color will be found in accessories this spring than has been seen in previous years. This is largely due to new dye processes which makes color practical in accessory leathers and fabrics. Favorites will be clear yellows, peachy corals and turquoises.

### Soft Colors

Yellow is the fashion color for dresses; white is for highstyle coats. Pink and blue look good in all their shadings, along with a host of whitened neutrals. Blue and gray are expected to be favored colors for outerwear while red, white and blue lead the parade for sportswear.

For further information regarding the clothes pictured in this section, call MI 4-1100.
