At last I know how to have lots of roses in bloom all the time!

Year after year, most people start off with high hopes for their roses. They get some nice blooms. Then warm weather and insects bring disappointment.

This year can be different. Scotts called HAZE<sup>®</sup> the answer. It's a new balanced diet, research-DOWN<sup>®</sup> (only 1/2 cup per bush) - plus HAZE<sup>®</sup>, a new all-over protection against insects and HAZE<sup>®</sup>.

Nothing to mix, measure, spray or spill. Full foliage and quality blooms all season long. And results backed by Scotts famous money-back guarantee. Come in and let us show these remarkable new rose growers.

Introductory offer. Save \$5 when you buy the lifetime Scotts ZEPHYR<sup>®</sup> applicator together with DAWN and HAZE.
