Top Scholars Honored

Three area students were among 1963 Detroit Edison scholarship winners honored at the company's 11th annual Scholarship Day. Shown here touring Edison's Corners Creek power plant are (left-to-right) Jean Mosseso, 1006 Mohawk, Royal Oak; Kathleen Kehoe, 1863 Franklin, Berkeley; and Jerry Lohla, 1092 Brooklawn Court, Birmingham. Miss Mosseso graduated from St. Mary's High School in Royal Oak and is now in her freshman year at Siena Heights College; Miss Kehoe, a graduate of the Shrine of the Little Flower High School, is in her first year at Marygrove College. Lohla, winner of the Edison-sponsored National Merit (4-year) scholarship, is attending the University of Michigan. He graduated from Birmingham High School last June.

This & That

(Continued From 3-A)

a bill giving U.S. colleges, universities and other segments of the public and private educational systems the sum of a billion two hundred million dollars, just watch how this largess eventually will be requested to embrace elementary and secondary systems. Most people still think it's cheaper to get money from Washington, D.C., than it is to levy local taxes and spend the money by local officials. Maybe educators now will be able to teach the taxpayers otherwise.

Insider's Newsletter recently published a statement that Michigan's Gov. George Romney will not be a presidential candidate in 1964 on the Republican ticket. Says that the Mormon Church, of which Romney is a devout member, opposes such candidacy now — although admitting that at some future time a Mormon will occupy the White House. (And our Governor is still a comparatively young man at 56.)

For 21 years President and Mrs. Johnson have employed one Zephyr Wright as their cook. Now she is in the White House with them. One secret recipe she uses is for a special bread. Report has it that the bread is so wonderfully delicious and nourishing that the Johnsons could make a fortune just selling the franchises for its nationwide distribution. I know that the Johnsons are worth a great deal of money, but I hadn't realized that they had that secret kind of dough!

To argue that reasonable development and use of automation is wrong is to argue that every technological progress that replaces less efficient ways of doing things is wrong. It is, in a considerable measure, like arguing that the horse and buggy never should have been replaced by the automobile. Unreasonable use of automation is, of course, forced upon industry and business because labor constantly increases the cost of producing things in the U.S.A. and thus automation is forced upon the U.S. because of the competitive use of cheaper labor in other nations.

the participation of all Birmingham residential associations and for formally organizing the council.

In commenting on McGill's announcement Monday night, Commissioner William E. Roberts said he thought the formation of the council was "a very good idea."

Commissioner Ralph A. Main added that he believed the plan "had a lot of merit to it."
