new-formula ultra nadinola® makes "age spots" fade away

A new cream from new clinical research, **ULTRA NADINOLA** now works even faster to fade away unsightly blotches, freckles and muddy discolorations which may unfairly stamp you as being "older".

Ultra Nadinola is an effective, safe way to fade those tell-tale signs of age. It is the new moisturizing cream that contains pigment-clearing Hydroquinone, in a new and finer formula.

Ultra Nadinola seeks out and fades away brown spots and other darkened areas with little or no effect on clear areas. Results begin gradually, become more dramatic with continued use. Even age spots you've endured for years finally give away to show fresher-looking, even-toned skin.

Ultra Nadinola has been proven safe for normal skin in extensive tests under doctor's supervision. Try it yourself. It is guaranteed by the maker to please you.
