Sweet Potatoes Differ from Yams

A sweet potato is a sweet potato, and a red yam is a yam, but most shoppers don’t know the difference. In North Africa and the Middle East, red yams are grown, but in the United States, brown-skinned, white-fleshed sweet potatoes are more common. The flavor of these potatoes is similar to that of yams, but they are not the same. The skin of sweet potatoes is thicker than that of yams, and the flesh is usually darker. In some cases, sweet potatoes may have a slightly sweeter taste than yams.

Follow Checklist for Driving Ease

Special Winter Care Guards Your Family’s Transportation

Tundra, PowerMaster, and PowerMaster 4 more reliable than ever. These three cars require less maintenance and are more fuel-efficient than the competition. They are also more comfortable and have advanced safety features.

Flexible System—You can now be confident that your car will start up reliably, without any delays or problems. The system is designed to work in all weather conditions and is easy to maintain. Just follow the simple instructions to ensure that your car stays in top condition.

250 Hardwoods Are Available for North America

For centuries, the hardwood forests have provided fuel for the production of furniture and other products. These forests are located in the United States, Canada, and parts of northern Europe. The trees are harvested sustainably to ensure their long-term survival.
