ers, took him and his friends to Henry Ford Museum Saturday, Jan. 25. Invited for lunch at Richard's home before going to the museum were Tom Herzig, Mark Damsrow, Jack Hamilton and Mark Ganas.

NANCY MADISON and her brother, Stanley, arrived aboard the freighter Grobnick when it docked in Philadelphia Jan. 21. They had boarded the ship at Naples to return home from a trip through Denmark, Germany, Holland, Belgium, England, Austria, Italy, France, Spain and Yugoslavia.

They started out on motor scooters, but Nancy said they only used them for about six weeks, sold them in Yugoslavia and hitchhiked the rest of the way. They stayed overnight in youth hostels, which also provide cooking facilities.

"The trip was wonderful," enthused Nancy, "I like Europe and want to go back. Everyone over there was good to us. Everything is geared for students. They know you don't have much money and they let you into museums and everything like that free."

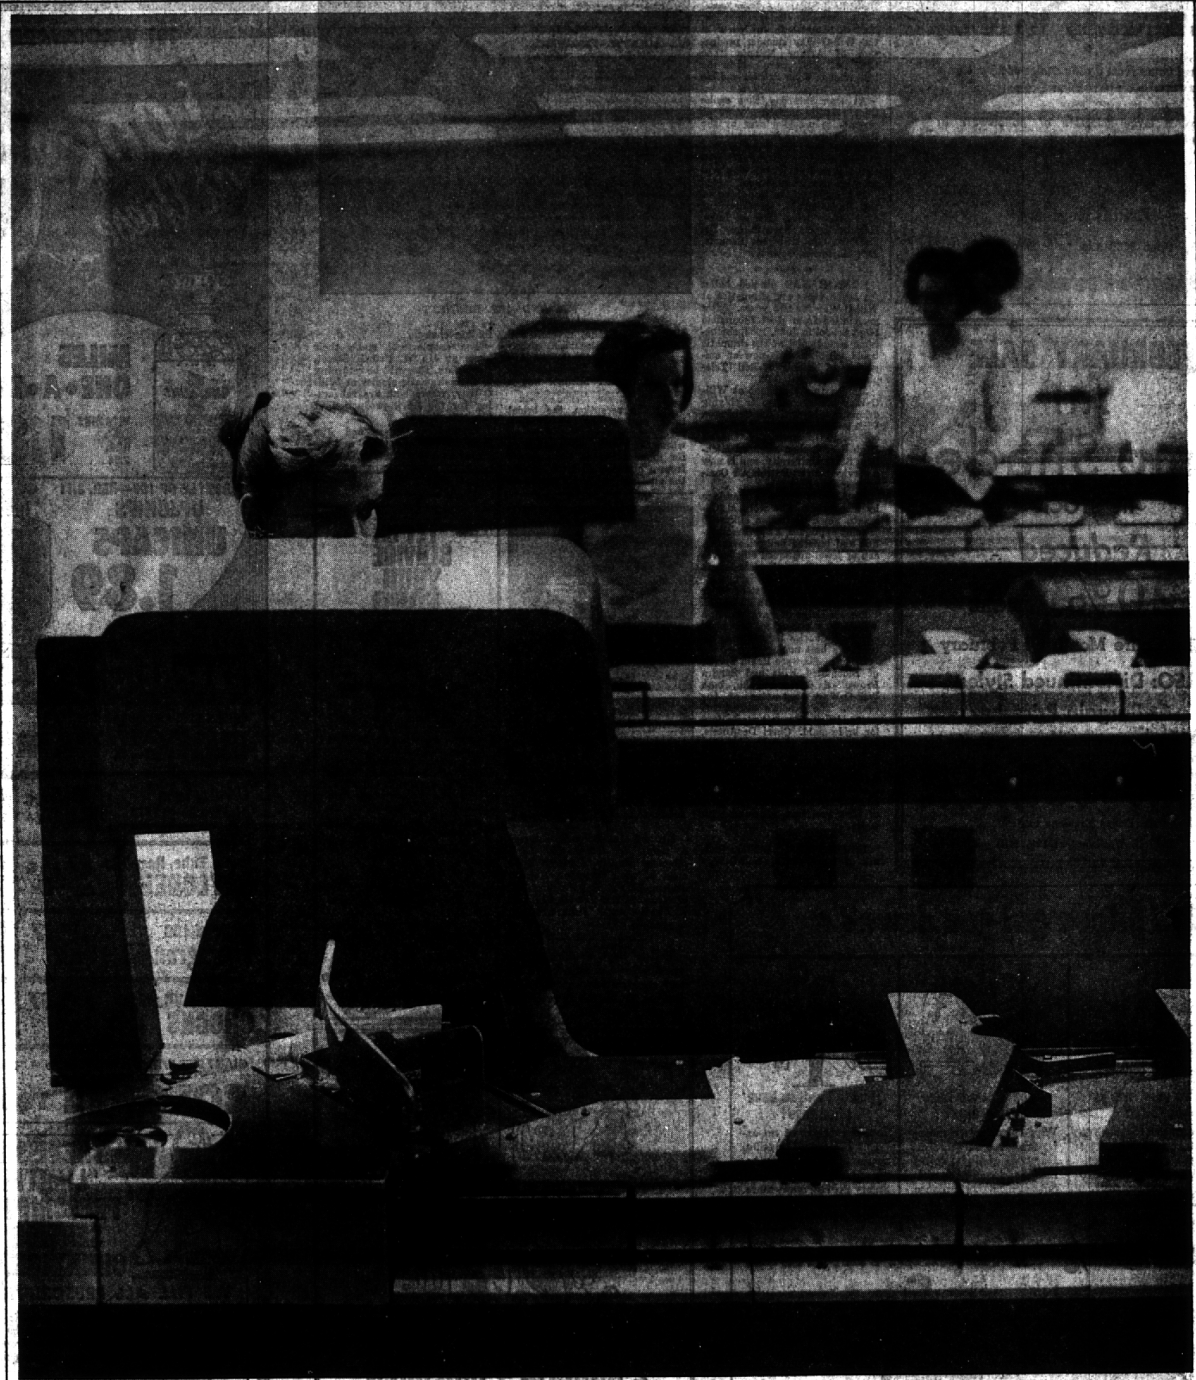

Without hesitation, she declared that Spain is her favorite European country, and quickly added that it is probably because she speaks Spanish and so was able to get to know the people better. Asked if she's still on good terms with her brother after traveling for four months with him, she answered, "Oh, yes. We got along great!"

Nancy, daughter of Mrs. Vincent Madison, 1801 Humphreys, graduated from Seaboard High School in 1961, attended Central Michigan and is planning to transfer to Wayne State in March.

MRS. FLOYD G. ABATT and George Gale will appear before Torrey PTA members Tuesday, Feb. 11, at 8 p.m. to report on the recommendations of the Citizens Study Committee on elementary curriculum. Mrs. Abatt and Mr. Gale are representatives from Greenfield School on the steering committee.

William Lyman, chairman of the Citizens Study Committee, has already presented the report to the Birmingham PTA Council and the Board of Education.

A sampling of the general recommendations: "Lengthen school day by one half hour a week, for fourth, fifth and sixth grades. The Board of Education and administration officials proceed to explore plan to eliminate grade levels and let pupils advance at their own speed. Class room teachers be relieved of lunch hour supervisory duties and playground duties."

Ever wonder about those odd-looking numbers on the face of your checks? Well, these are special magnetic numbers and these are some of the girls and machines that "read" those numbers and use them to help sort as many as 500,000 checks a day. We like the machines (and the girls). They help us serve our customers more efficiently. We hope you're one of them. If not... 2,000 people in our 62 offices are eager to go to work for you. Why not let them?
