Railroad model with full figured dial. Gleaming stainless steel case. Black calf strap. \$125.00

USED AS A TIMING DEVICE IN SATELLITES AND TELSTAR

- Only ACCUTRON keeps time by the constant vibrations of a tuning fork activated electronically. It doesn't tick...it hums.
- Only ACCUTRON does away with the hairspring and balance wheel, the parts which limit the accuracy of all watches.
- Only ACCUTRON—with just 12 moving parts—is so rugged, so trouble-free you can forget about usual watch maintenance and repair.
- ACCUTRON never, never needs winding—even off your wrist.
