

School Can Help Child To Adjust

ANN ARBOR—Children sometimes have a difficult time trying to decide whether they are successes or failures, says Malcolm A. Lowther, University of Michigan assistant professor of education.

"It isn't easy for the child to determine, because what might be a failure in his home may be a success in a friend's home or in school," says Lowther.

"For these reasons a child may be very uncertain about the quality of his academic behavior."

LOWTHER BELIEVES the school plays an important role in helping the child assess his performance.

"The school provides children, often for the first time, with a clear set of criteria against which his performance is measured and all children are deliberately informed as to the quality of their school achievement," he says.

"In fact, addition to grading performance, we constantly drum into the child's head the importance of school to his future success, and even ultimate happiness. Hence the relationship between school achievement and self-esteem."

Recent studies show that high achievers feel higher self-esteem than low achievers.

"SINCE THIS is so, from a mental health standpoint, all students should be given the chance to experience some success relating to school activities," says Lowther.

He also stresses the importance of the teacher's attitude.

"The way a teacher responds to a child's failure has an important bearing on how the child takes it," he reminds.

"The pupil may not pass a test but he does not have to be told that he is a failure as a person."

"In short," Lowther concludes, "the teacher must consider the impact of his own behavior on his pupils."

Legal Notices

Hill, Lewis, Andrews, Adams, Goodrich & Pease, Attys., 3200 Piedmont Bldg., Detroit 46226

STATE OF MICHIGAN—The Probate Court for the County of Oakland. At a session of said Court, held at the Probate Office in the City of Pontiac in said County, on the 14th day of July A.D. 1964.

Present: Hon. Donald E. Adams, Judge of Probate.

In the Matter of the Estate of Virginia H. Harris, Deceased.

Charles E. Lewis having filed a petition praying that an instrument filed in said Court be admitted to Probate as the last will and testament of said deceased, and that administration of said estate be granted to Charles E. Lewis, the executor named in said will or to some other suitable person, and for determination of the legal heirs of said deceased.

It is Ordered, That the 25th day of August A.D. 1964 at 10 o'clock in the forenoon, at said Probate Office, is hereby appointed for hearing said petition.

It is Further Ordered, That public notice thereof be given by publication of a copy hereof, once each week, for three successive weeks, previous to said day of hearing, in the Birmingham Eccentric a newspaper printed and circulated in said County and that proponent cause a copy of this notice to be served personally or by registered or certified mail, return receipt demanded, to each of the known heirs at law, legatees and devisees at their last known place of address at least ten days prior to said day of hearing.

DONALD E. ADAMS
Judge of Probate

I, Carol MacDonald, Deputy Register of the said Probate Court, do hereby Certify that I have compared the foregoing copy with the original record thereof, now remaining in this office, and have found the same to be a correct transcript thereof, and the whole of such original record.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the Seal of the Probate Court at Pontiac, this 14th day of July A.D. 1964.

CAROL MACDONALD,
Deputy Register of Probate Court,
Oakland County, Michigan.

(Seal) (21-22-23)

Donald K. Tyler, Attorney 1908 Dixie Building, Detroit 28, Michigan

STATE OF MICHIGAN—The Probate Court for the County of Oakland.

At a session of said Court, held at the Probate Office, in the City of Pontiac in said County, on the 14th day of July, 1964.

Present: Hon. Donald E. Adams, Judge of Probate.

In the Matter of the Estate of Richard P. Callaway, Deceased.

Phyllis M. Callaway, administratrix of said estate having filed in said Court a petition, praying for license to sell at private sale the interest of said estate in certain real estate therein described.

It is Ordered, That the 19th day of August, 1964 at ten o'clock in the forenoon, at said Probate Office, he and all persons interested in said estate appear before said Court, at said time and place, to show cause why a license to sell the interest of said estate in said real estate should not be granted.

It is Further Ordered that notice be given to all interested parties as shown by the records in this cause by delivery to each of them by registered mail with return receipt demanded addressed to their respective last known addresses as shown by the files and records in this cause.

And it is further Ordered that public notice thereof be given by publication of a copy of this order once each week for three successive weeks, previous to said day of hearing, in the Birmingham Eccentric a newspaper printed and circulated in said county.

DONALD E. ADAMS,
Judge of Probate

I, Opal Robertson, Deputy Register of the said Probate Court, do hereby Certify that I have compared the foregoing copy with the original record thereof, now remaining in this office, and have found the same to be a correct transcript thereof, and the whole of such original record.

IN TESTIMONY WHEREOF, I have hereunto set my hand and affixed the Seal of the Probate Court at Pontiac, this 14th day of July A.D. 1964.

OPAL ROBERTSON,
Deputy Register of Probate Court,
Oakland County, Michigan.

Compare Carbon Black In Uses to the Peanut!

Carbon black—a sophisticated "cousin" to that unpopular substance, soot—is one of the most useful products of modern industry, according to an article in Petroleum Today.

The magazine says that more than two billion pounds of carbon black are produced each year in 41 American plants, a quantity that comprises about 70 per cent of

the total world production.

Carefully designed to perform a variety of functions, carbon black is manufactured in 30 different grades by the controlled burning of oil or natural gas in the absence of sufficient oxygen to consume all the carbon.

THE RESULTING product, light and fluffy in texture, is used to

strengthen and toughen rubber tires, raincoats and conveyor belts. It goes into bowling balls, typewriter ribbons, eyebrow pencils, television tubes and printer's ink. Its particles are so tiny that the period at the end of a sentence in ordinary printed matter contains nearly one billion particles of carbon black.

It also has been used to help

control the weather and to protect farm crops against frost damage. The article says that under certain conditions, clouds can be made to produce rain when carbon black is dropped into them from an airplane.

When released in moist, cloudless air, carbon black can lift the fog from airports by absorbing heat

and causing the air to rise and form clouds in the sky.

THOUGH SOFT to the touch, carbon black is used as an abrasive for polishing the lenses, prisms, and reflectors of optical instruments.

It is also used to make some of the hardest tool-steel alloys and the most powerful explosives.

History records the use of lampblack as a pigment as far back as 1200 B.C. Ancient Romans and

Egyptians used ink made from lampblack, and centuries later Gutenberg used the same black substance to give body to the ink used in printing his Bible.

Carbon black's particles are so fine and powdery that one pound can cover a 16-acre area.

The late Rear Admiral Richard E. Byrd made use of this characteristic of carbon black by having bombs of the substance dropped on the snow at the South Pole to provide his surveyors and mapmakers

with wide and easily visible points of reference.

IN RECENT years, scientists have developed an electrically conductive form of carbon black which can be used in making tires that ground static electricity.

This provides important safety advantages for vehicles carrying large quantities of fuel, such as airplanes and tank trucks.

There's nothing like an accident to upset a vacation budget.
