

PEOPLE'S COLUMN

Feels Public Opinion Shades Logical Action

To the Editor: Listening to public opinions and pronouncements of some politicians, we fail to see an intelligent, independent or logical thinking governing their speech or actions.

a communist-trained Castro; they did not withhold aid, air and naval support to the Bay of Pigs Cuban liberators.

Fortunately for our country that there is a group of loyal Americans, who refuse to be stampeded into joining the ranks of some of our most vicious politicians willing for the sake of expediency to cooperate and coexist with evil forces.

They are trying to return this government to the dignity and respect that we once held and eradicate the 50 years of treason.

Does history condemn our Lord, the Creator as a hate monger, because he refused to coexist with evil Satan and his cohorts?

Read: "None Dare Call It Treason," by John A. Stormer, Liberty Bell Press. It is highly documented and will refresh your memory.

Does history condemn our Saviour because he would not tolerate the money changers and pharisees desecrating the temple?

Does history condemn as hate mongers and extremists George Washington, Nathan Hale, Paul Revere and hosts of other patriots, who could not tolerate tyranny and taxation without representation?

A special highlight of the evening was a presentation entitled, "Humpty-Dumpty, The First Egg-head" given by the Reverend and Mrs. Robert Marshall and their five children.

But the patriots of our day who refuse to coexist with treason, deceit, moral decay, atheism, mongrelism, socialism and Communist slavery are branded as hate mongers or right-wing extremists.

ON SUNDAY evening, August 16, at 8 p.m. Reverend Marshall will speak at the church on the theme, "Man's Fate and Man's Hope."

Just to keep the record straight the extreme right did not give billions of taxpayers' dollars to Communist Russia and other atheists, who shoot our sons in violation of international laws.

This will not be a book review but a provocative consideration of the nature and destiny of mankind. Discussion and questions will follow.

They did not let captive nations down the Volga River at Teheran, Yalta and Potsdam; they did not betray the nationalistic China upon orders of high officials in our government departments to dump their ammunition into the ocean to leave them defenceless before the Communist China.

Interested persons are invited to attend.

They did not keep us from military victory in Korea; they did not fire Gen. Douglas MacArthur, because he wanted no substitute for victory; they did not withhold aid from Hungarian, Polish and East Berlin freedom fighters; they did not give orders to forcibly return 5,000,000 refugees back behind the Iron Curtain after World War II.

ing money in pockets, part of which went to the state in taxes.

They did not withhold the victory of Berlin from our Army and allowed Russians to plunder Berlin; they did not help overthrow Batista's west-oriented government and help to replace it with

Another certainty is that the several lean years previously made administrators more conscientious of the value of the money they had to spend.

They DID not withhold the victory of Berlin from our Army and allowed Russians to plunder Berlin; they did not help overthrow Batista's west-oriented government and help to replace it with

These include landmarks which cause blind intersections, dangerous curves on the roads themselves, and, probably most important of all, the drivers who have bad driving records.

Tough treatment on known bad drivers has been set down on the record books this year. Secretary of State James M. Hare reports more revocations and suspensions of licenses the first half of this year than ever before.

ONE APPROACH to traffic improvement is to take the known hazards off the roads.

Pointing up some common errors in motoring to the several times offender frequently will make him mend his ways, Hare's department feels.

ON THE POSITIVE side, however, Hare also reports that his office is attempting to step up its driver improvement program for the sometimes errant drivers.

The steady rise in the death rate will likely continue, if the first-half annual statistics are any indication, but revocations, suspensions and lecture techniques may be part of the large key which will turn this unfortunate tide.

PERHAPS MOST difficult to evaluate is who or what should really get the credit for the increased revenue.

Some factors outside the executive offices and legislative halls certainly must be considered. Three consecutive boom years in the auto industry provided additional spend-

ing money in pockets, part of which went to the state in taxes.

Nuclear Plants Increase Michigan Tourist Interest

The explosion that rocked a remote western desert air base July 16, 1945, has been carried at various locations along the popular recreational beaches of Michigan's Great Lakes.

The test blast of the first atomic bomb demonstrated the potential energy which is now being harnessed and carefully guided into areas contributing to the progress of modern civilization.

Aiding in the task of harnessing atoms for useful purposes are the waters of Lakes Michigan and Erie which pour into the condensers at Big Rock Point near Charlevoix and the Enrico Fermi plant near Monroe.

ALTHOUGH BOTH nuclear plants share the same ultimate goal of producing electricity, each uses a different method.

THESE ARE the nuclear research and development laboratories of Consumers Power Company at Charlevoix and the Detroit Edison Company at Monroe.

The Fermi plant operates a fast breeder reactor—one that actually produces more and a different type of nuclear material than it consumes in the process, thus building new supplies of energy fuel rather than depleting it.

Energy produced at Charlevoix already is channeled intermittently into the electricity-producing capacity.

At this installation on the Lake Michigan shores, enriched uranium produces heat which in turn operates the water condensers to produce steam.

Romney Picks Men To Investigate Facts In Hospital Dispute

Gov. Romney has appointed a three-member special commission under the state labor mediation act to determine the facts in a labor dispute between Pontiac Osteopathic Hospital and Local 79, Building Service Employees' International Union, AFL-CIO.

A BY-PRODUCT of both nuclear plants is their attraction to tourists and their vacationers.

A visitor information center at Big Rock Point includes a small auditorium used for explanatory talks to groups.

At the press of a button, mysterious atoms are explained, and viewers may look at a cutaway scale model of the plant, accompanied by a recorded narrative.

IN ADDITION to vacationers, members of Congress are again in the thick of the coming campaign.

MICHIGAN MIRROR

Knowledge of Appeals Court Election Stressed by Officials

By ELMER E. WHITE. Lack of familiarity by the voting public with an issue or official can be dangerous to both the candidates and the electorate.

LEGISLATORS OF his persuasion also were given some credit for the fiscal stability by Romney in a recent announcement of the financial position.

BEING A NON-partisan race, the judges ballot will be separate from other offices in both paper and machine precincts.

ROMNEY said it was largely due to the thrifty attitude of GOP lawmakers in writing budgets that Michigan was able to retire its debt and get some extra funds in the public coffers.

Elections officials say regretfully that frequently machine voters ignore nonpartisan contests.

ROMNEY said it was largely due to the thrifty attitude of GOP lawmakers in writing budgets that Michigan was able to retire its debt and get some extra funds in the public coffers.

Many well qualified candidates, including local judges and present and former state legislators, have filed in the Appeals Court district races throughout the state.

ROMNEY said it was largely due to the thrifty attitude of GOP lawmakers in writing budgets that Michigan was able to retire its debt and get some extra funds in the public coffers.

FINAL AUDITS will not be completed until mid-September, but tentative figures on activity during the fiscal year ended June 30 indicated a good financial position for the state.

ROMNEY said it was largely due to the thrifty attitude of GOP lawmakers in writing budgets that Michigan was able to retire its debt and get some extra funds in the public coffers.
