## NEW Fingertip Controlled HUMIDIFIER

operates on  
less than 1/2¢ per day!

We all know the benefits of adequate humidification: how it improves health, protects furniture, and saves fuel. The unique operating principle of the Drumatic humidifier gives you all these advantages with the highest moisture output at the lowest operating cost. LESS THAN 1/2¢ PER DAY! And you can do it all the desired humidity by means of a Honeywell humidistat that can be placed anywhere in the home for convenient, controlled humidification. The Drumatic utilizes a polyethylene foam evaporating pad on a motor driven speeded rotating wheel in a pan of water. Calcium deposits are absorbed by the pad—eliminating mineral dust in the air. When the pad becomes filled, it is easily replaced. The Drumatic will supply adequate humidification for areas up to 3,000 square feet.

## Doctor Suggests Alphabet Books

Parents who have worked with their pre-school youngsters on alphabet books were given a boost recently by a nationally known reading expert.

Dr. Helen Murphy, of the Boston University reading clinic, told 80 Oakland County educators that at Boston University has shown that until a child knows the names of letters he will not learn to read.

CHILDREN who enter school in September knowing their letters averaged a reading vocabulary of 199 words by January. Children who knew only a few of the letters in September were able to learn as many words in their first semester.

Dr. Murphy has been conducting a one-week class in reading for teachers of Oakland County first graders. She addressed members of the Oakland County Curriculum Council, an organization of elementary principals and curriculum supervisors at a luncheon Thursday.
